IWSense

IWSense

IWSense

IWSense is a modular and distributed weather/abiotic sensing based on wireless network for precision agriculture.

MAIN FEATURES:

Innovative Technology that allows monitoring:

- **Temperature;**
- **Humidity;**
- **Moisture from the leaves;**
- **Soil moisture;**
- **Solar radiation;**
- **UV radiation;**
- **Rain gauge;**
- **Atmospheric pressure;**
- **Wind speed and direction.**

Invention

Innovation

Today

Developing (InovWine)

**Pilot (Adega Cooperativa Cantanhede,
Sogrape, Duorum)**

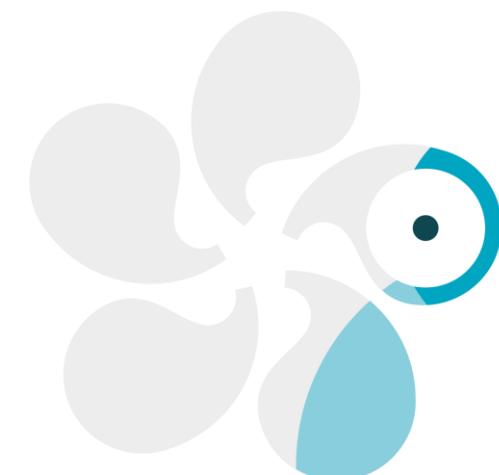

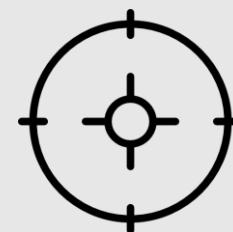

Refining (INNOACE)

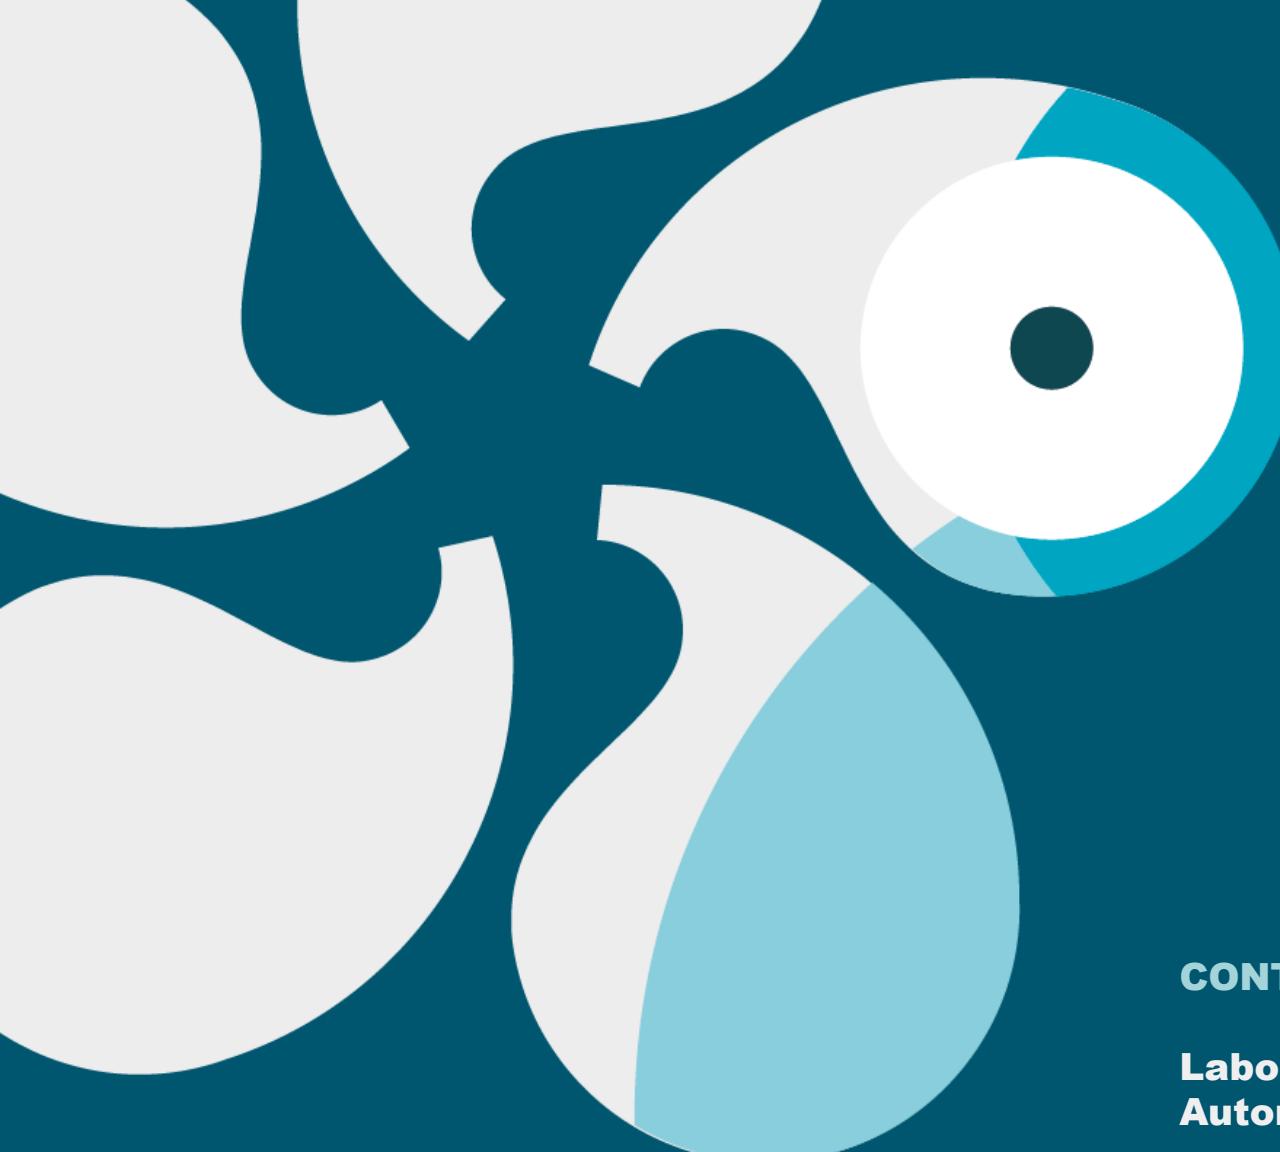

**Pilot and Integration with
other applications**

**S3 – High Tech Farming
Platform**

**TECHNOLOGY
COMMERCIALISATION**

CONTACTS
