

Smart Specialisation Platform for Industrial Modernisation

Thematic Partnership

Sport Innovation Partnership- ClusSport

Start Date September 2017

MONITORING PROGRESS REPORT

Reporting Period: from November 2017 to June 2018

This Report is presented to the relevant Working/Steering Committee.
It contains three parts:

- I. Management Report prepared by the Lead Region(s)***
- II. Progress Report prepared by the Lead Region(s)***
- III. Previous versions of the Progress Report; i.e., part II of past reporting periods***

The report is a “cumulative” report, i.e. it is updated annually and covers the entire period of the Partnership.

Confidentiality: the documents will be made available to the public via the Partnership's web page except for chapter *II.E. Self evaluation*.

Based on the monitoring results, the European Commission will decide on the following year's support.

Executive summary (max. 250 words):

Physical Activity and Sport are important drivers for the European growth. Their cross sectoral impact with many disciplines and sectors such as health, tourism, construction, education, urban planning and environment has exponential spillover effects for the development of cross regional cooperation and supporting territorial and business competitiveness all over Europe. Combining Smart Specialisation strategies and Cluster policies is at the heart of the Sport Innovation Partnership also called ClusSport, which aims to develop a pipeline of public private investments projects to boost regional economic growth and employment. ClusSport gathers 10 European regions and their clusters. The project has successfully led to two types of mapping delivered the the support of ReConfirm: one stakeholder mapping taking into account all European actors (public and private) related to sport, and another one, focusing on the 10 participating regions, which sought to identify key regional assets and areas of convergence. They built on a scoping report, delivered in 2017. A workshop, and multilateral exchanges between the participating regions, facilitated the emergence of 12 cooperation projects. At this stage, the cooperation projects are delivered with the aim of being turned into co-investment protocols which will have practical socio-economic impacts on the partnering regions and beyond.

II. Progress Report prepared by the Lead Region(s) of the partnership, describing **results achieved during this period**, in no more than 3 pages (the report is “cumulative”).

All items listed in Sections A, B, and C, below, must be addressed.

Additional documentation such as extended technical reports and/or proceedings of workshops may be provided separately as an annex to this report (and should be referenced in the report).

II.A. Innovative results

- Innovative results and achievements that could be attributed to the Partnership. (Specific examples of Results vs. Objectives)

@Partners to complete

- Tangible short- and medium-term socio-economic impacts achieved or expected. (Specific examples)

Please enter here...

II.B. Inter-regional and inter-partnership collaborative results

- Additional results obtained from working *with other partnerships* under the thematic S3 Platforms. (Specific examples)

Please enter here...

- Evaluation of the involvement of relevant business sector (clusters, SMEs, business associations, chambers of commerce, etcetera) in the Partnership activities. (Specific examples)

The ReConfirm sport team has fostered a reflexion on the involvement of clusters, SMEs and so on, since the inception of the process:

- In the questionnaire designed to prepare the mapping, all regions were specifically asked about the private actors they were involved with or with who they would like to get involved

- The stakeholder mapping realised by SPI identified all the actors revolving around the sport industry, which includes actors from the private sector, notably clusters and companies.

- In the conception of the pitch asset, as well as in the project factsheets which summarise the characteristics of the cooperation projects, specific questions were asked about the private actors (cluster and SMEs) to ensure that they are taken into account;

This has enabled fruitful results:

Clusters are well involved in the project. Four out of ten regions (Flanders, BE Catalonia and Valencia, SP, and South Netherland, NL) have actively involved their clusters in the project.

The presence of EPSI in the partnership brings the cluster sphere closer from the partnership.

The organisation of a matchmaking event in Turin, involving SME, enables to connect the cooperation projects with SMEs. This allows to validate the relevance of the cooperation project with the market needs, as well as involve SMEs efficiently.

- Evaluation of whether **the level of inter-regional cooperation is sufficient** to potentially provide **practical and relevant socio-economic impacts**. (Specific examples)

The regions have seized the potential for developing cooperation projects (preliminary to the co-investments) as a mean to create new activities and economic growth. Therefore, and with regards to the 12 cooperations projects which have already been designed, it is likely that regions mutually benefit from practical and relevant socio-economic impact.

II.C. New activities

- Involvement of regions from EU13 Member States in the Partnership, in particular with respect to scoping, mapping and/or matchmaking. *In addition, justification should be provided if no EU13 regions are involved.*

- Activities and projects with partnerships working under other S3 Thematic Platforms (*Agri-Food, Energy and Industrial Modernisation*).

In Lapland, in april 2018, the parntership organised a joint conference with Watify on tourism. A workhsop was also organised with JRC and Interreg Europe @ Partners to complete.

II.D. Your Partnership and the UN 2030 Sustainable Development Goals (SDGs)

The EU has a strong position when it comes to sustainable development and is also fully committed to be a frontrunner in implementing the UN's 2030 Agenda¹, together with its member countries and regions. Many interregional partnerships under the thematic S3 Platforms contribute strongly to the attainment of these 17 goals.

Please indicate to which Sustainable Development Goals and to what extent your thematic Partnership contributes?
