#SMARTSPECIALISATION

BILBAO
SPAIN

Parallel session on:

IP in interregional collaborations

The objective of the session is to give an overview on the relevant intellectual property issues in the context of interregional collaboration projects involving both industrial partners and research institutions.

The session aims to provide a comprehensive and unitary analysis of concrete intellectual property aspects and challenges that need to be considered when forming interregional collaboration - how IP rules can be agreed, how IP regimes can be defined, strategic protection and exploitation models applicable in collaboration activities.

Execution of the session:

11.20 – 11.40 **Introduction and expert presentation - Inna Dimova**

Practical overview of the intellectual property considerations in the process of development and implementation of interregional collaboration projects

11.40 – 12.10 **Table discussions among participants along the following questions:**

Questions related to IP in interregional collaboration projects:

1. Legal system applicable to your interregional collaboration – how to define it?
2. How IP challenges could be tackled by partners in interregional collaboration projects?
3. Research and development activities in interregional collaboration projects - what are the IP solutions for the outcomes resulted by such activities?

12.10 – 12.40 **Q&A**
