

# International good practice case studies of University-Industry Cooperation

*Todd Davey*

*Joint  
Research  
Centre*

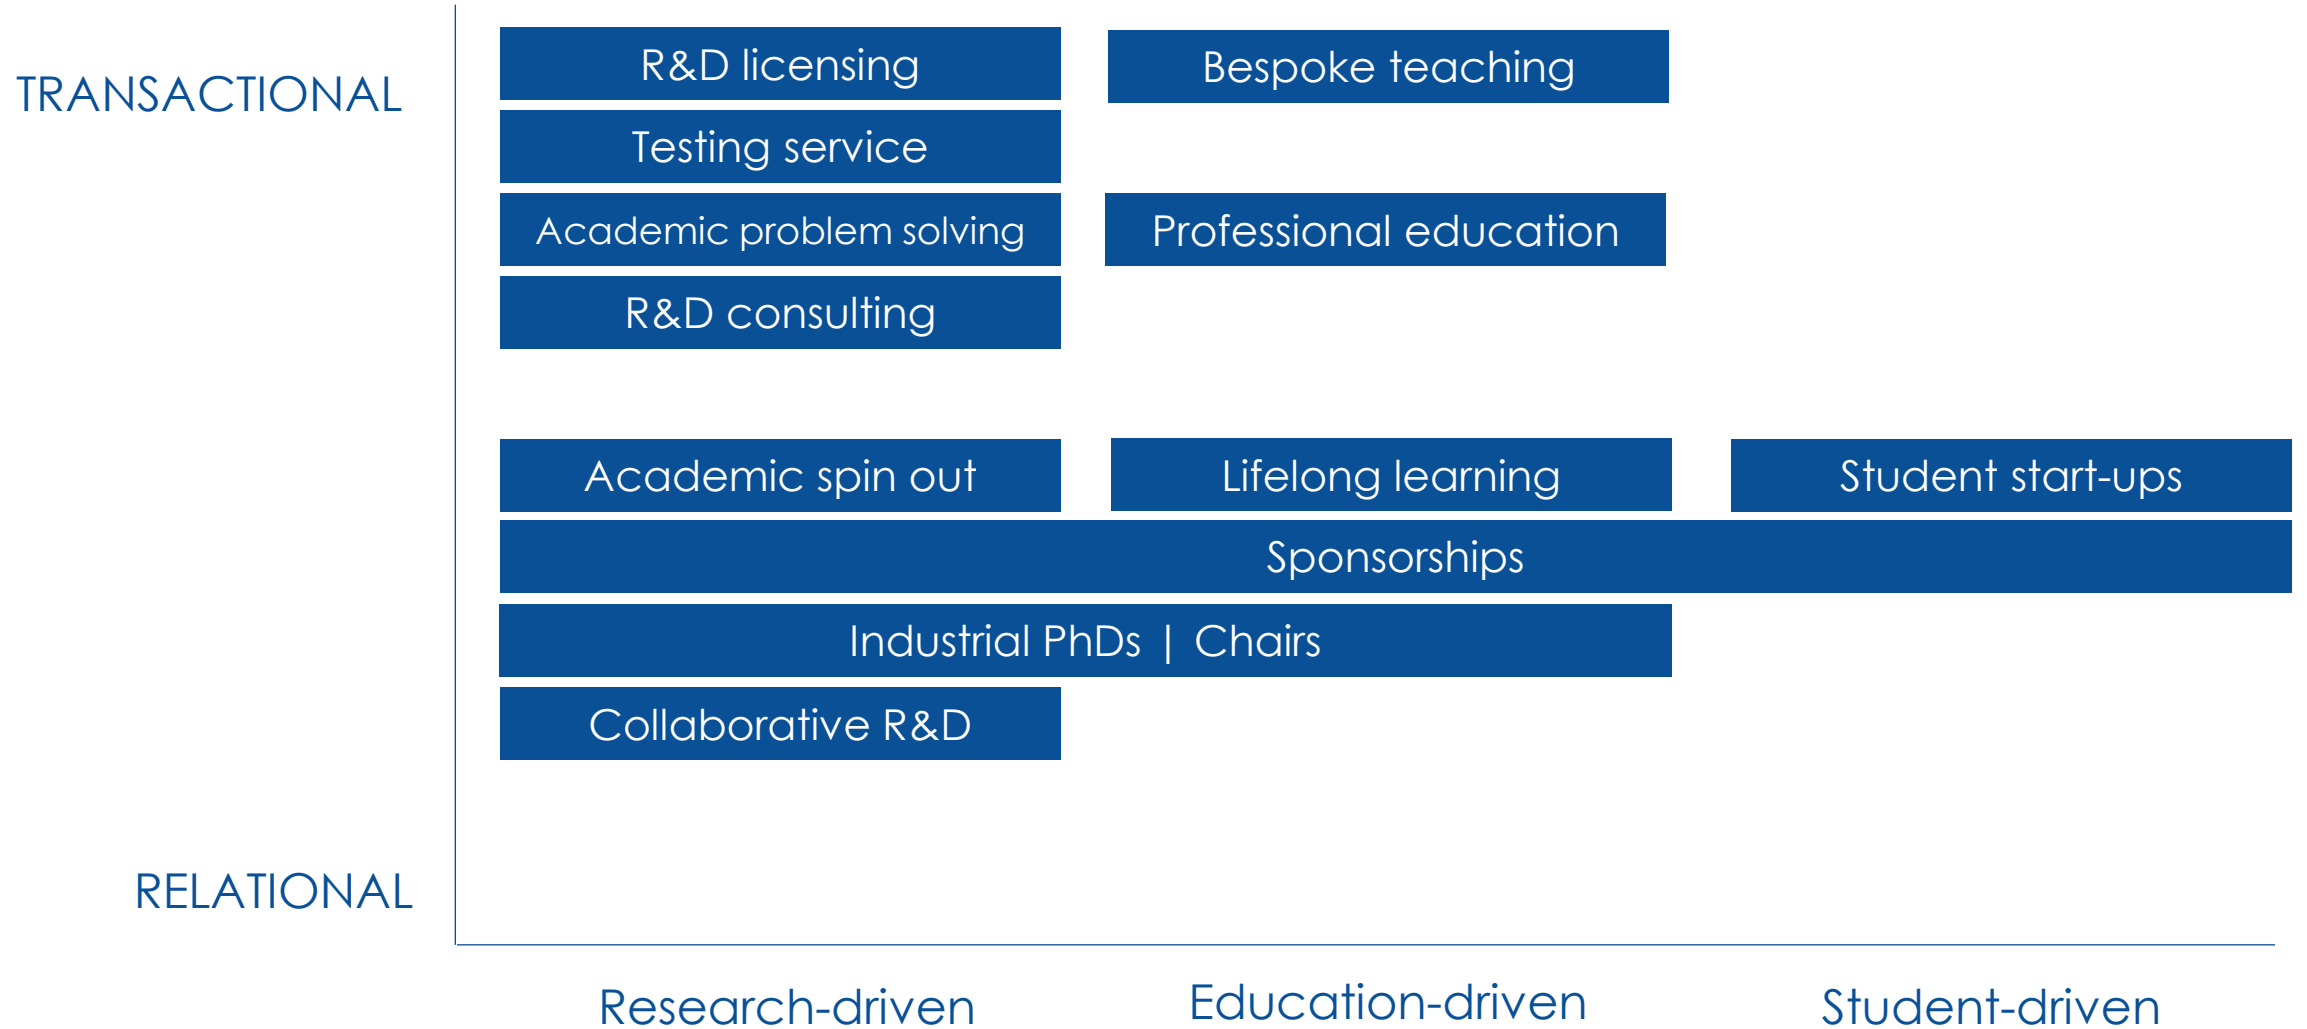

## TRADITIONAL VIEW OF UNIVERSITY-BUSINESS COOPERATION

“

Any activities aimed at transferring knowledge or technology that may help either the company or the academic institute – depending on the direction of transfer – to further pursue its activities.

”

# Traditional university-industry cooperation activities

# Traditional university-industry cooperation activities

	Description	Advantages*	Disadvantages*
R&D licensing	A formal agreement that allows the transfer of technology between two parties	<ul style="list-style-type: none"> <li>• Upfront and reoccurring fee possible</li> <li>• Uniqueness, point of difference</li> </ul>	<ul style="list-style-type: none"> <li>• Further involvement often required to make it work</li> <li>• Cost: Patents, legal fees, fees</li> </ul>
Testing service	Work involves analysis, measurement or testing and a high degree of intellectual input	<ul style="list-style-type: none"> <li>• Fee for work</li> <li>• Can lead to consulting work</li> <li>• Scientific validity</li> </ul>	<ul style="list-style-type: none"> <li>• Takes the academic away from other research work</li> <li>• Fees, timeframe uncertain</li> </ul>
Academic problem solving	Advisory services provided by individual academic researchers to their industry clients	<ul style="list-style-type: none"> <li>• Fee for work</li> <li>• Can be lucrative</li> <li>• Direct result</li> </ul>	<ul style="list-style-type: none"> <li>• Takes the academic away from other research work</li> <li>• Can be costly</li> </ul>
R&D consulting	Directly commercially relevant research to firms and is explicitly commissioned by firms to be applied	<ul style="list-style-type: none"> <li>• Fee for work</li> <li>• Solves immediate problems</li> </ul>	<ul style="list-style-type: none"> <li>• Takes the academic away from other research work</li> <li>• Lack of investment from academic</li> </ul>
Academic spin out	A new company founded to exploit a piece of IP created in an academic institution	<ul style="list-style-type: none"> <li>• Academic autonomy</li> <li>• Research/tech-driven leads to potentially higher returns</li> </ul>	<ul style="list-style-type: none"> <li>• Time consuming and bureaucratic</li> <li>• Takes the academic away from other research work</li> </ul>
Collaborative R&D	Joint research funded by both business supplemented with govt. funds or academic time dedicated	<ul style="list-style-type: none"> <li>• Funded research</li> <li>• New knowledge and technologies</li> <li>• Builds reputation</li> </ul>	<ul style="list-style-type: none"> <li>• Differences in motivations and desired outcomes</li> <li>• No result emerges</li> </ul>

Note: Advantages and disadvantages for academics and business marked in black and blue respectively

Should we primarily focus on R&D licensing?

In 1991, the total license revenue for US universities was \$130 million, in 2015 it was \$2.4 billion.

Since 1970, Stanford had over 5,000 patents issued, only 79 of those generated more than a million, only 3 generated more than \$100 million.

However, 15 US universities produce nearly 70% of the US license income.

# MODERN VIEW OF UNIVERSITY-BUSINESS COOPERATION

“

*Exchanging,  
co-creating*

*People with knowledge  
and technology*

Any activities aimed at transferring knowledge or technology that may help either the company or the academic institute – depending on the direction of transfer – to further pursue its activities.

”

# Modern university-industry cooperation activities

# Early-stage (strategic) research partnerships

Münster University of Applied Sciences, Germany

FH MÜNSTER  
University of Applied Sciences

## Old paradigm of technology transfer

## New paradigm of knowledge transfer through early-stage partnering

# Strategic (innovation and recruitment) partnerships

Siemens, Germany

*Siemens university-industry interaction approach is based on various stages, from one-time collaboration, to framework contracts to a strategic partnership*

SIEMENS

*Key success factors:*

- 1. Long-term commitment e.g. CKI programme*
- 2. Relationship management e.g. Siemens CKI Managers resident within universities.*
- 3. Aligning research and innovation to talent acquisition*

# Early-stage (strategic) research networks

AMIRA P260 Supply Chain Research Partnership

Short term  
(Problem solving)

SITE  
VISITS

APPLIED  
RESEARCH

“BLUE-SKY”  
RESEARCH

Long term  
(basic research)

Includes:

- Consortium of large mining / minerals companies
- SME supply chain partners
- Research institutions

Running for over 29 years

Project iterations (3-4 years each)

Co-funded (industry supplemented by government)

RESULTS

300 refereed research publications

50 PhD students

41 working mining and processing sector

Total benefits: \$1AU billion (€670 Million)

Recognise motivations & (ideally)  
ensure desired stakeholder outcomes

# Student-Business IP Program

Tampere, Finland

## DEMOLA

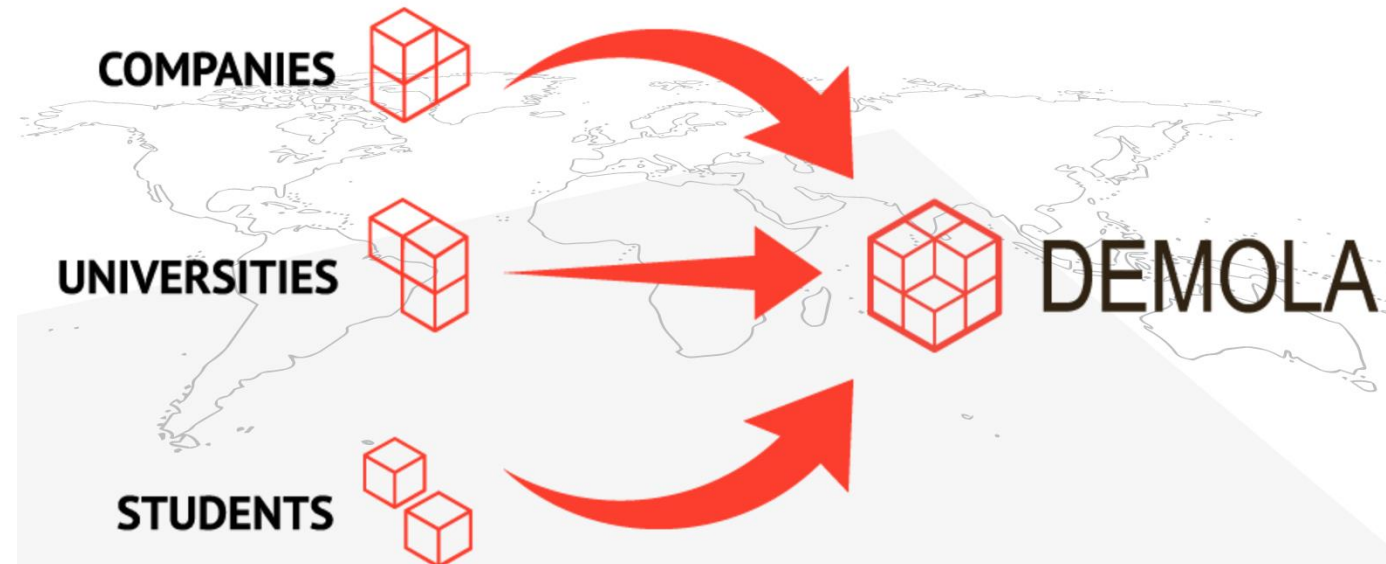

**BUSINESS** - Bring **business challenges, technologies, ideas** to students. Businesses buy the idea back at the end of the project based on three models

### RESULT

- 96% of completed Demola projects are licensed by the project partners.
- Over 10% of students are headhunted by the companies they worked with; and all students get a taste of entrepreneurship.

**STUDENTS** - (cross-disciplinary) Develop **solutions, new technologies and new business concepts** over 4 months, including 3 pitches and creation of a prototype. Get to own the **idea if the business doesn't want it, gets paid if they do.**

**UNI** - manage the **programme** and IP, provide **mentorship** and assign marks and credit points to students

# (Entrepreneurship) Academic-SME spin-out

Flinders University, Australia

- University **recruited an entrepreneur** to develop the **academic spin-out** within the **university incubator**.
- University provides the **patent license** and **incubation** and takes a **share in the enterprise**
- **EXAMPLE: RE-TIMER**
  - Partnered with an industry partner: SMR Automotive, a medium-sized Australian contract manufacturer who wanted to grow and diversify.
  - Competencies in lighting and injection moulding
  - The incubator supplied the entrepreneur and technology
  - International (expert) focus

Change your sleep rhythm to suit your lifestyle

- What is a Circadian Rhythm?
- Delayed Sleep Phase
- Advanced Sleep Phase
- Winter Blues
- Shift Workers
- Jet Lag
- Buy Re-Timer

**You have an internal clock**  
Your body's natural sleep rhythm is governed by an internal clock that sleep psychologists call a circadian rhythm

**Disruptions can occur**  
This circadian rhythm can become disrupted resulting in difficulty falling asleep

**A scientific solution**  
Re-Timer is based on 25 years of science from world renowned sleep psychologists at Flinders University in Australia

**Wear Re-Timer**  
Re-Timer gives you the freedom to fall asleep and wake up when you choose

Poster for centre

Deliverables for everyone

€7,500 each project

Financed curricula-bound projects support research at the centre and increased student employability:

- Projects overseen by a PhD student with experience
- Projects managed by Master students
- Projects executed by bachelor students

Features:

- Intial briefing and then re-briefing
- Taking minutes weekly sent to partner
- On site visit
- Tools used each semester
- Research undertaken
- Presentation

Potential material for publication

Entwicklung einer Internationalen Marketingstrategie

International Business Project in Market Analysis  
Future Business Opportunities in Megacities for egypt

...that Mr. JAMES WELLS, student in the Master Class "International Business Project in Market Analysis" at the Münster University of Applied Sciences, has completed his project work on the topic "Future Business Opportunities in Megacities for egypt". The project work results were presented to the project management and the task assignment of his sub-group (see attached documents) and were evaluated by the project management and the task assignment of his sub-group (see attached documents). The project work results were presented to the project management and the task assignment of his sub-group (see attached documents) and were evaluated by the project management and the task assignment of his sub-group (see attached documents).

Megacities der Welt im Fokus

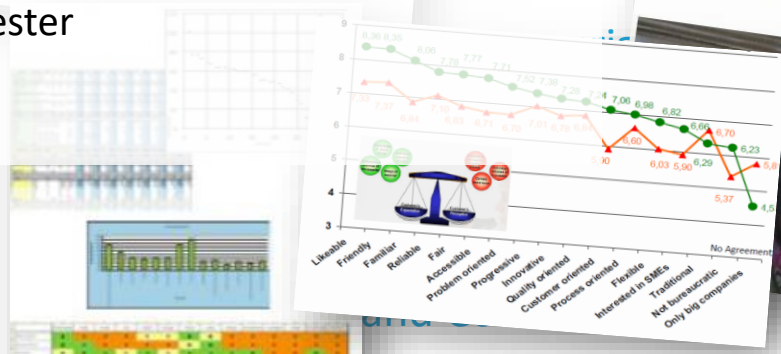

Große Städte rückten im letzten Semester in den Mittelpunkt des Interesses von Masterstudierenden am Fachbereich Wirtschaft

In dem Projekt "Megacities" ging es darum, große Städte und deren Wasser-, Abwasser- und Gasrohrsysteme zu beleuchten. Den Auftrag für die weltweit ausgebreitete Marktanalyse erhielt die Projektgruppe unter der Leitung von Prof. Dr. Thomas Baaken, Dr. Tobias Kesting und Arno Meerman von der egeplast international GmbH mit Sitz in Greven. Das Unternehmen plant in naher Zukunft, seine Rohrleitungen verstärkt im Ausland zu vermarkten.

# AIMday

A simple concept of getting scientists and professionals from industry to get to build trust through collaboration

*Uppsala, Sweden*

## “One question, one hour, one group of experts”

An event where **businesses and public organisations** get to **discuss actual problems**. It is organized since 2008 by Ångström Academy, a part of Uppsala University Innovation (UUI). Between 2008 and 2019 **more than 50 AIMday events** were organised.

### Outcomes:

- Creation of new contacts and trust building
- Knowledge transfer between researchers and businesses/organisations
- New approaches to solving problems
- Collaborative projects

# Infracore Hackathons

## Global

"Hackathons are a **testing ground for new ideas**. They attract a diverse pool of participants, **bringing multiple perspectives**. The time-sensitive nature of a hackathon creates a uniquely **productive atmosphere** that encourages participants to distil their ideas into actionable solutions. After all, necessity is the **mother of invention**."

### Format

- Short **design sprints** that aim to **solve specific challenges** or problems
- The teams consist of **data scientists, designers, developers, and entrepreneurs**, and the solution can take the form of software, an app, a website, and more

### Themes

- **Digital Twins**: Can digital replicas of infrastructure be used for better planning and maintenance?
- **Energy Utilisation**: How can we accelerate the adoption of clean energy and utilise energy more efficiently?
- **Defect Detection**: How can we use artificial intelligence to predict and prevent faults from occurring?
- **Connected Infrastructure**: What can we achieve if our assets are allowed to talk to each other?

## COUNTRIES

USA, United Kingdom, Australia, India, Singapore, Denmark, Philippines, Portugal, Germany, Canada,

## 15 PARTNERS

Network Rail, TfL, NIC, National Grid, BEIS, YPP, Northumbrian Water, Mott Macdonald, Highways England, Centre for

# Challenge Projects

Institute Mines Telecom Business School, France

## WHAT IS AN URBAN CHALLENGE?

**'Students' incl** ... act as consultants to solve city/regional issues

- Bachelor
- Master
- Phd
- Academics
- Industry
- Societal actors
- ...

(delivered in a programme run by universities)

### Elements:

Seminars | Master classes

Workshops

Immersion (site visit)

Mentors

Online system support

Tools

### Timeframes:

- 2 days
- Semester long
- Summer school
- Curricula bound or extra curricula

## EXAMPLE: URBAN CHALLENGE

### IN NUMBERS

# Dual study programmes

VW & Baden-Württemberg Cooperative State University, Germany

An emerging **hybrid form of higher education**, which offers the participant the opportunity to complete a:

1. A **degree programme** at a higher education institution
2. A **certification of practical vocational training** or **work experience in a company**.

## In Germany:

- **70%** of these courses are related to the **engineering field** and to **economics and business studies**.
- The remaining **30%** is made up by computing, social sciences and others.

## BADEN-WÜRTTEMBERG COOPERATIVE STATE UNIVERSITY (DHBW)

First university in Germany to combine **on-the-job training at numerous partner enterprises and classical academic studies**.

With around **34,000 enrolled students**, over **9,000 partner companies** and more than **145,000 graduates**, DHBW is one of the largest higher education institutions in Baden-Wuerttemberg.

About their dual study programmes:

- lasts **8 semesters** on average.
- students **to earn whilst they learn** through a **monthly payment**
- ultimately leads to a **job at VW**.
- can be undertaken in a **range of topics** including: information technology, mechanical engineering, electrical engineering etc.

Baden-Württemberg Cooperative  
State University (DHBW)

# Dual study programmes

VW & Baden-Württemberg Cooperative State University, Germany

## VOLKSWAGEN GROUP

Dual study programmes can be undertaken in any of the **six VW locations in Germany.**

**Areas of specialisation** include business studies; electrical engineering; body structure development; automotive information technology; information technology; mechanical engineering; sales management; mechatronics; materials sciences; logistics; industrial engineering; and, economics.

The **programmes** should:

- Allow extended periods of time in the company,
- Flexible to the academic curriculum requirement
- Executed in 12-week periods
- Last 8 semesters

Baden-Württemberg Cooperative  
State University (DHBW)

# Lifelong learning focus

Danube University Krems, Krems, Austria

Founded in 1994 as a centre for continuing education, DUK's entire educational structure is geared towards the particular standards and requirements of middle-aged professionals and executives.

More than 9,000 students from 91 countries studying 200 different courses make it one of the leading universities of continuing education in Europe today.

- 50% of students have worked in their fields for more than 10 years
- 15% of the students have successfully launched their own companies after their studies.

# Curriculum development & delivery | Research

Clemson University International Center for Automotive Research

**An exemplary automotive-sector public-private cooperation in research and education**

## **Deep orange**

- Vehicle prototype 24-month program where students, multi-disciplinary faculty, and participating industry partners work together to produce a new vehicle prototype each year.
- Hands-on learning experience in multi-disciplinary teams.
- Sponsored by major automotive industries of Toyota, Mazda, General Motors and BMW.

***“It’s the only program of its kind where students begin with nothing more than ideas and finish with a vehicle”***

Deep Orange Vehicle Prototyping Program is an extraordinary initiative that gives students the opportunity to create a prototype vehicle in two years

URBAN MOBILITY FOR GENERATION Y & Z
