

# S3 IMPACT ON GOVERNANCE

Reflections from Lithuania

Ramojus Reimeris

09.11.2020

## GENERALLY

- S3 concept is a lot about the governance (full policy cycle, setting up governance scheme and etc.)
- S3 allows certain level of distribution of governance (platforms, agencies, coordinating groups)
- S3 promotes openness and inclusion, that has impact on the design of governance (monitoring, transparency, discussion, accountability)

## LITHUANIA

- No fundamental changes, but positive and important upgrades
- The main changes happened in the documentation, decision making process and accountability
- Some further changes are foreseen to happen – slow, but steady improvements
- S3 as a good practice

# LITHUANIA

## NEW FOR 2014 - 2020

- EDP as the main process to set the priorities
- Yearly monitoring
- Smart specialisation Coordination group

## NEW FROM 2021

- Facilitators
- One responsible institution: Ministry of Economy and Innovation
- Monitoring of skills as part of S3

THANK YOU!

That was reflections from Lithuania
