

# CATALYST EUROPE

**Thinking  
differently**  
is critical to  
innovation

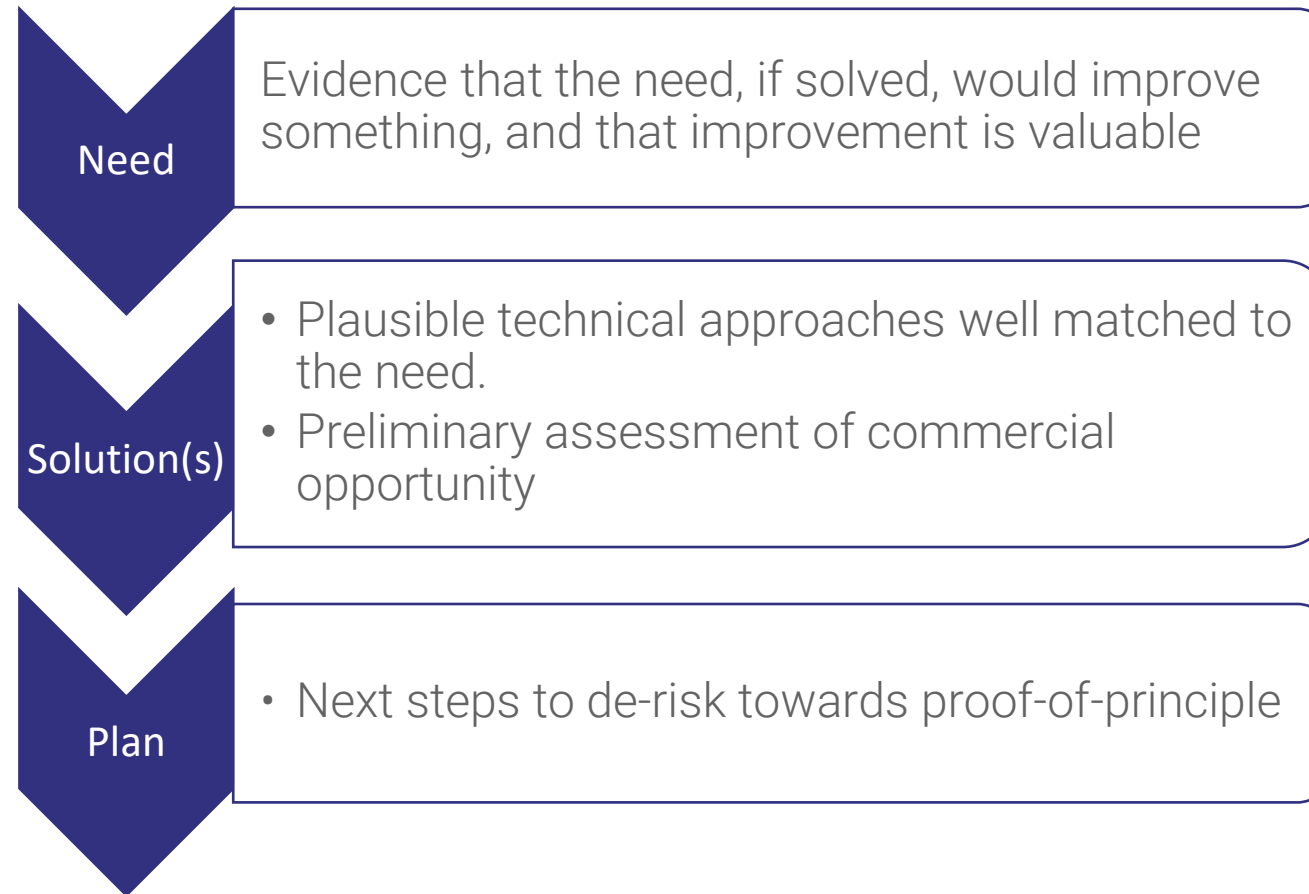

A person wearing a white lab coat is seated at a desk, working on a laptop. Several books are visible on the desk. The entire image is covered with a semi-transparent purple gradient. Overlaid on this gradient are three lines of white text, which are the questions from the slide.

Who will be better off?  
How will they be better off?  
How will you know?
