SMART ENERGY

BRIDGE is a European Commission initiative which unites Horizon 2020 Smart Grid and Energy Storage Projects to create a structured view of cross-cutting issues which are encountered in the demonstration projects and may constitute an obstacle to innovation.

The BRIDGE process fosters continuous knowledge sharing amongst projects thus allowing them to deliver conclusions and recommendations about the future exploitation of the project results, with a single voice, through four different Working Groups representing the main areas of interest:

Data management

Business models

Regulations

Customer engagement

Involvement of actors in R&I SG projects

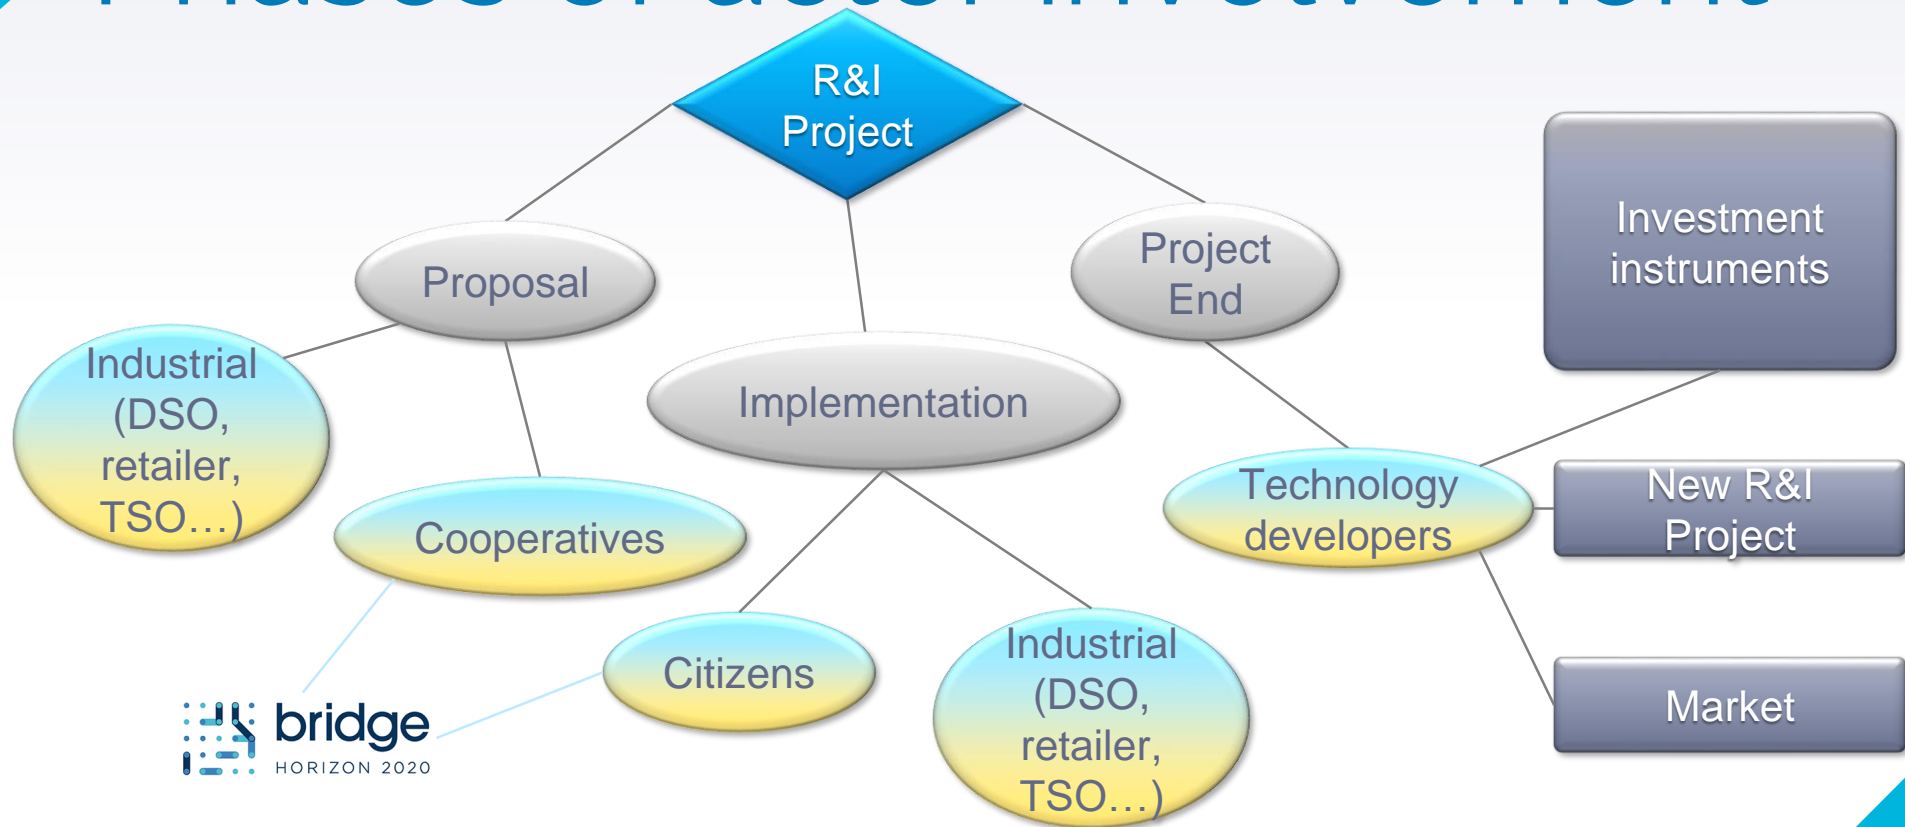

Big Challenge

To find actors willing to
demonstrate new Smart Grid
technologies

All about win-win situations

Phases of actor involvement

Successful Case:

WG Cockpit

WiseHOME

WiseCORP

WG Fast V2G

WiseEVP

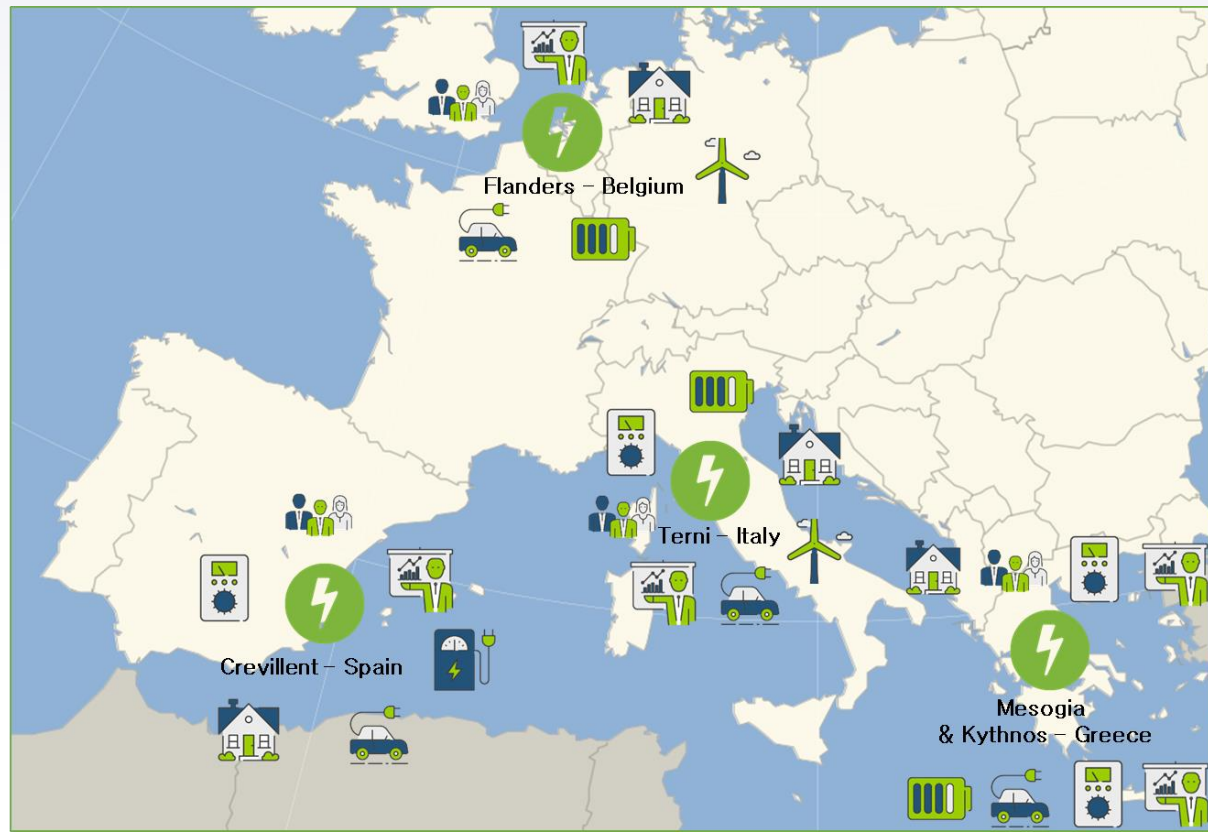

WiseCOOP

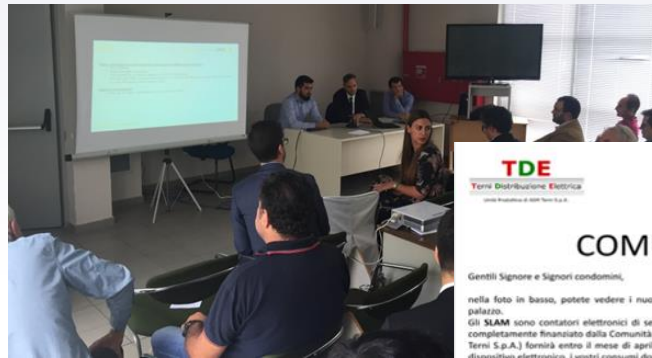

WG STaaS/VPP

WG RESCO

Successful Case:

THANKS!
