

Overlapping traditions – we'll need to keep the language simple

- Economic geography
- Industrial economics → restructuring
- RIS3 / regional development policy
- Transitions
 - *Industrial restructuring within existing regimes*
 - *Socio-techniocal transitions in general?*
 - *Sustainability transitions in particular?*
 - *Missions?*

Some of the interesting 'how to' activities

- Finding and agreeing what the problem/challenge is
- Legitimation
- Prioritisation
- Visioning/ road mapping
- Engaging stakeholders in implementation
- Capture and principal-agent problems
- Government, governance and accountability
- Role and engagement of incumbents

Nasties?

- Demand
- Making money
- Role(s) of incumbents
- Investment and scaling-up
- Deconstructing sectors into
 - *Challenges*
 - *Supply-side capabilities*
 - *Driving transition Challenges*
 - *Supply-side capabilities*
- Locomotive companies?
- A new ‘Dutch disease’?
- Extending the policy boundary
- Strategy uniqueness (fish?)
- Diversification
 - *Related*
 - *Distant*
- Driving transition from
 - *Challenges*
 - *Supply-side capabilities (ships?)*
- Systemic thinking in the policy mix (e.g. skills)
- Capacity and capability in the regional state
- SDGs? Really? **All 17?**
