

# Innovations for Sustainability: Pathways to an efficient and sufficient post- pandemic future

2020 Report by The World in 2050 initiative

Caroline Zimm

Transitions to New Technologies Program

International Institute for Applied Systems Analysis

[zimmc@iiasa.ac.at](mailto:zimmc@iiasa.ac.at)

STI SDG Virtual Expert Consultation June 30, 2020

# Content

- 1) TWI2050 initiative and the need for accounting for interactions across systems when tackling multiple goals
- 2) The paradox of innovation
- 3) the power of a demand-side perspective and granular technologies in innovations for sustainability

# How to achieve multiple goals?

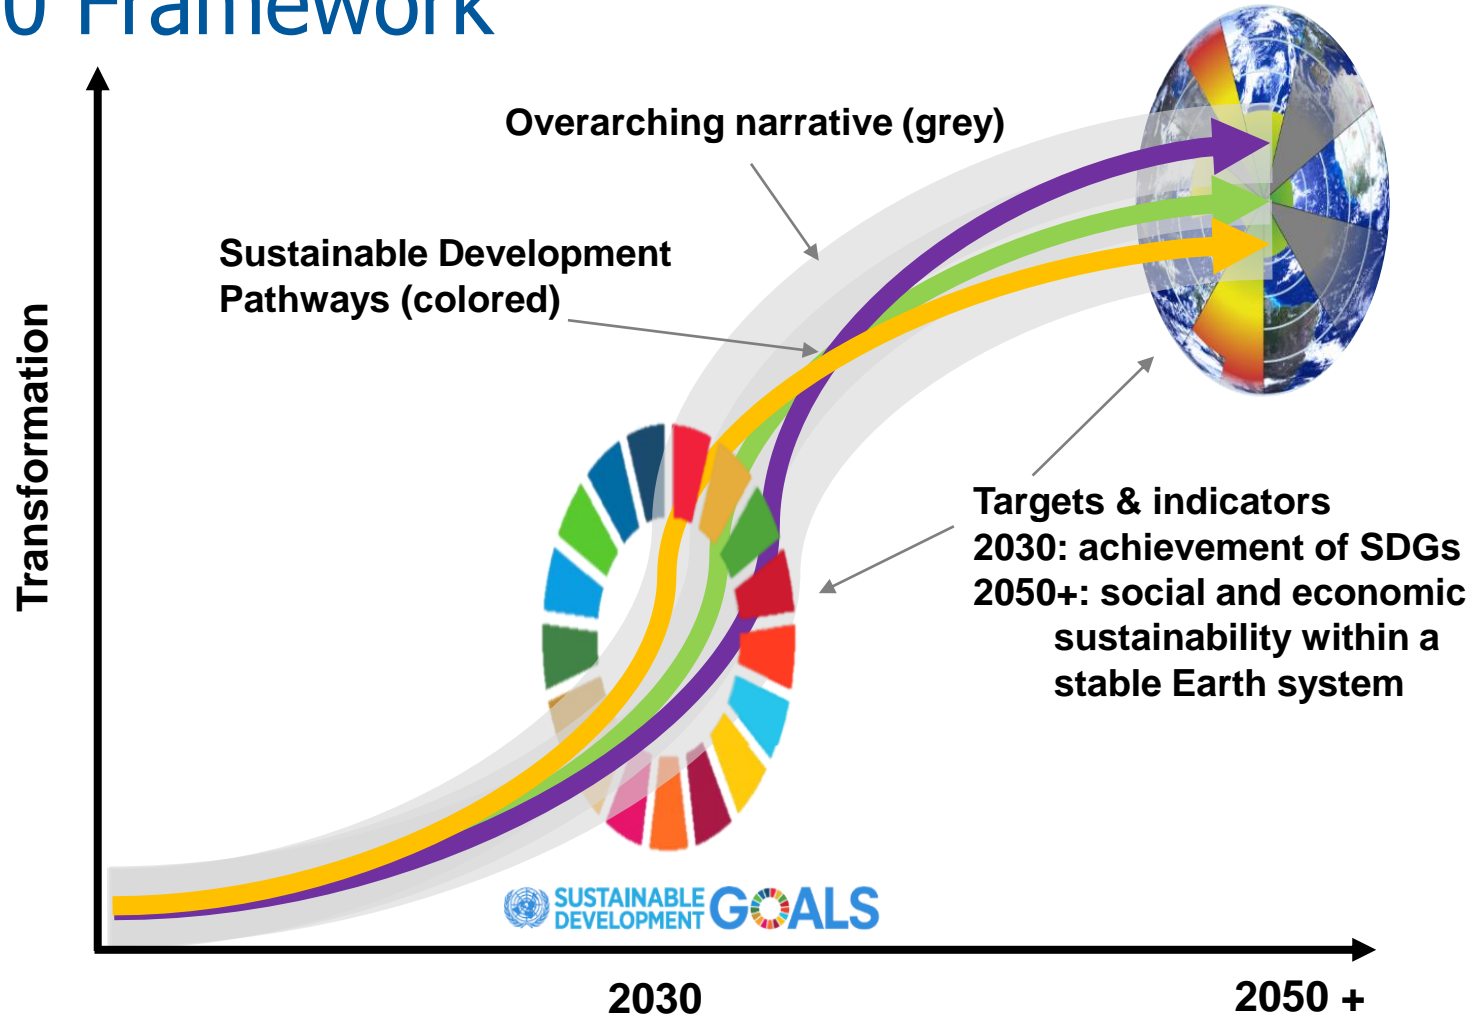

# Systems thinking to harness synergies & avoid tradeoffs

Integrated approach needed: to feed 9 billion people and protect biodiversity at the same time.

# TWI2050 Framework

# Six TWI2050 Transformations

## Digital Revolution

Artificial intelligence, big data, biotech, nanotech, autonomous systems

## Human Capacity, Demography & Health

Education, aging, labor markets, gender, inequalities

SDGs

Prosperity  
Social Inclusion  
Sustainability  
Resilience

COVID-19  
RESPONSE

## Consumption & Production

Resource use, circular economy, sufficiency, pollution

## Smart Cities

Decent housing, mobility, sustainable infrastructure, pollution

## Food, Biosphere & Water

Sustainable intensification, biodiversity, forests, oceans, healthy diets, nutrients

## Decarbonization & Energy

Energy access, efficiency, electrification, decent services

# Six TWI2050 Transformations

**Digital  
Revolution**  
Artificial intelligence, big  
data, biotech, nanotech,  
autonomous systems

**Human Capacity,  
Demography & Health**  
Education, aging,  
labor markets, gender, inequalities

**Smart Cities**  
Decent housing,  
mobility,  
sustainable  
infrastructure,  
pollution

**SDGs**  
Prosperity  
Social Inclusion  
Sustainability  
Resilience

**COVID-19  
RESPONSE**

**Consumption &  
Production**  
Resource use, circular  
economy,  
sufficiency, pollution

**Food, Biosphere &  
Water**  
Sustainable intensification,  
biodiversity, forests, oceans,  
healthy diets, nutrients

**Decarbonization &  
Energy**  
Energy access, efficiency,  
electrification,  
decent services

# The World in 2050 (TWI2050) initiative reports

## **2020: Innovations for Sustainability: Pathways for and efficient and sufficient post-pandemic future**

Virtual launch @ UN HLPF in July 7, 14:00-15:00

Registration to open soon!

## **2019: Digital Revolution and Sustainable Development: Opportunities & Challenges**

## **2018: Transformations to Achieve the SDGs**

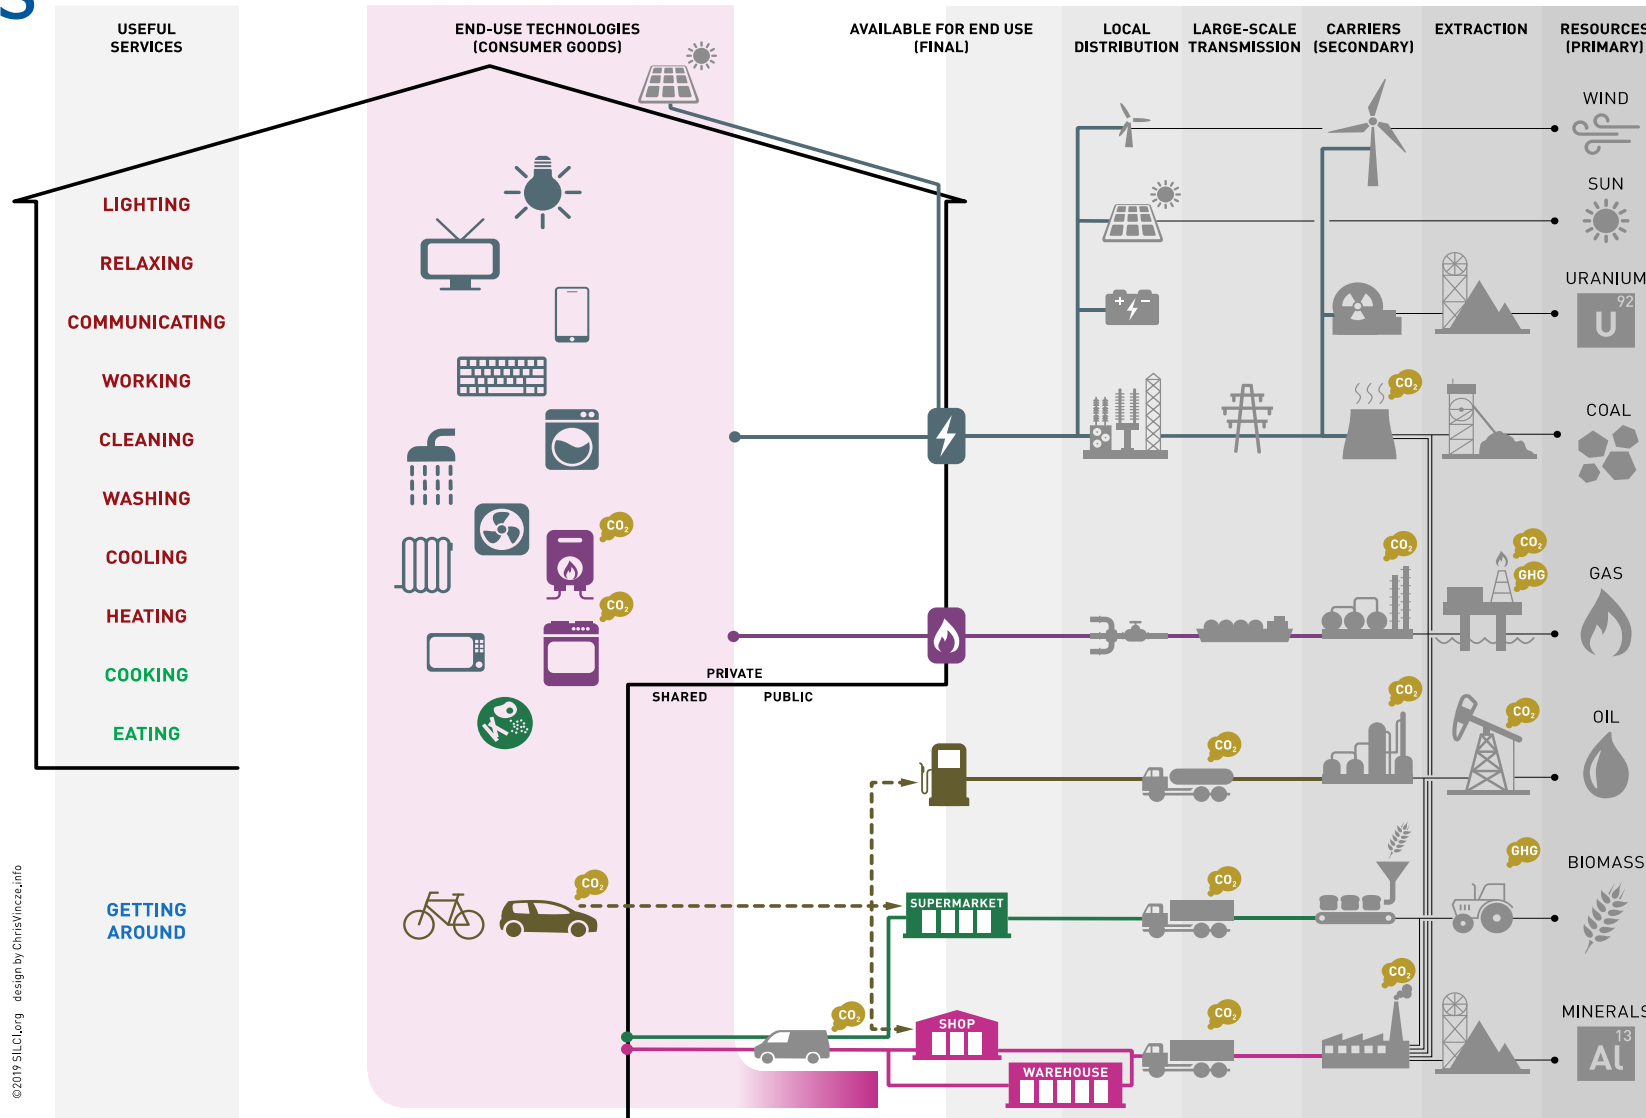

# Paradox of innovation

- Innovation is at the core of human development.
- It is also at the core of the Great Acceleration and the infringement on Earth-system stability.
- Innovation has brought us into the Anthropocene with all its negative impacts on humans and the planet.
- Innovation can also provide the solutions to achieve the SDGs.
- Innovation happens in response to human problems. Often bringing about new problems thus leading to a problem – solution cycle.
- Innovation can be technological, social or behavioral, or institutional.
- We need people-centered and sustainability-oriented innovations.

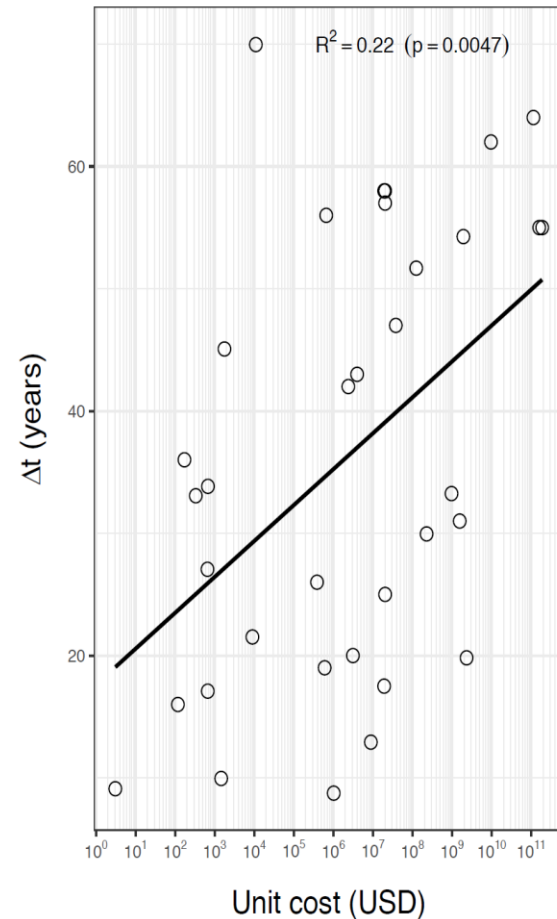

# People-centered perspective to leverage efficiency potentials

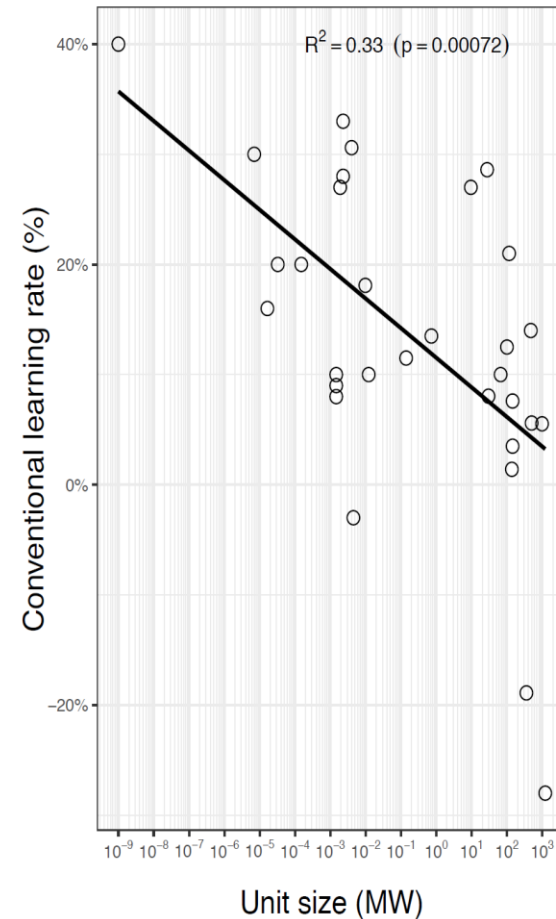

©2019 SLUCL.org design by ChristVince.info

# Transformational power of granular technologies I

(i) Diffusion timescales

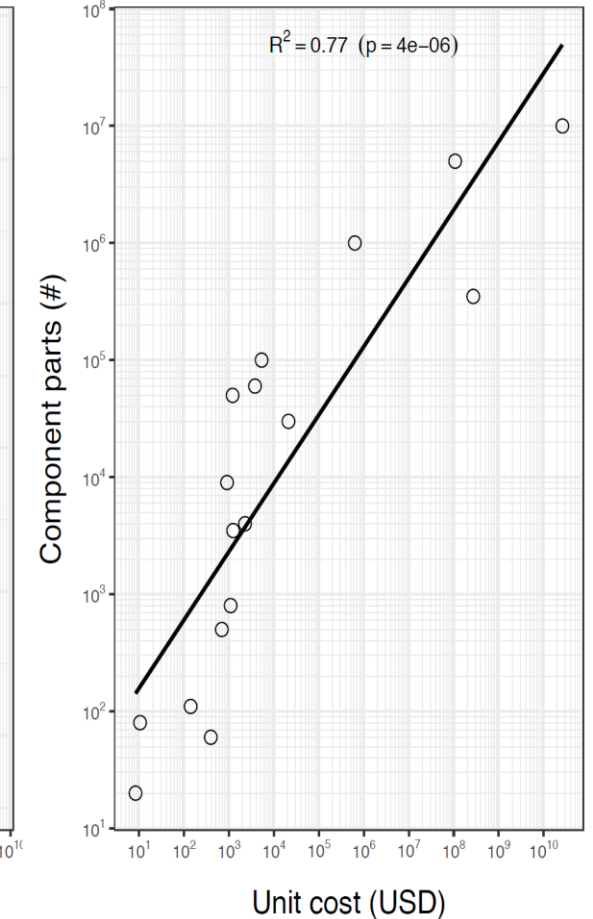

(ii) Conventional learning

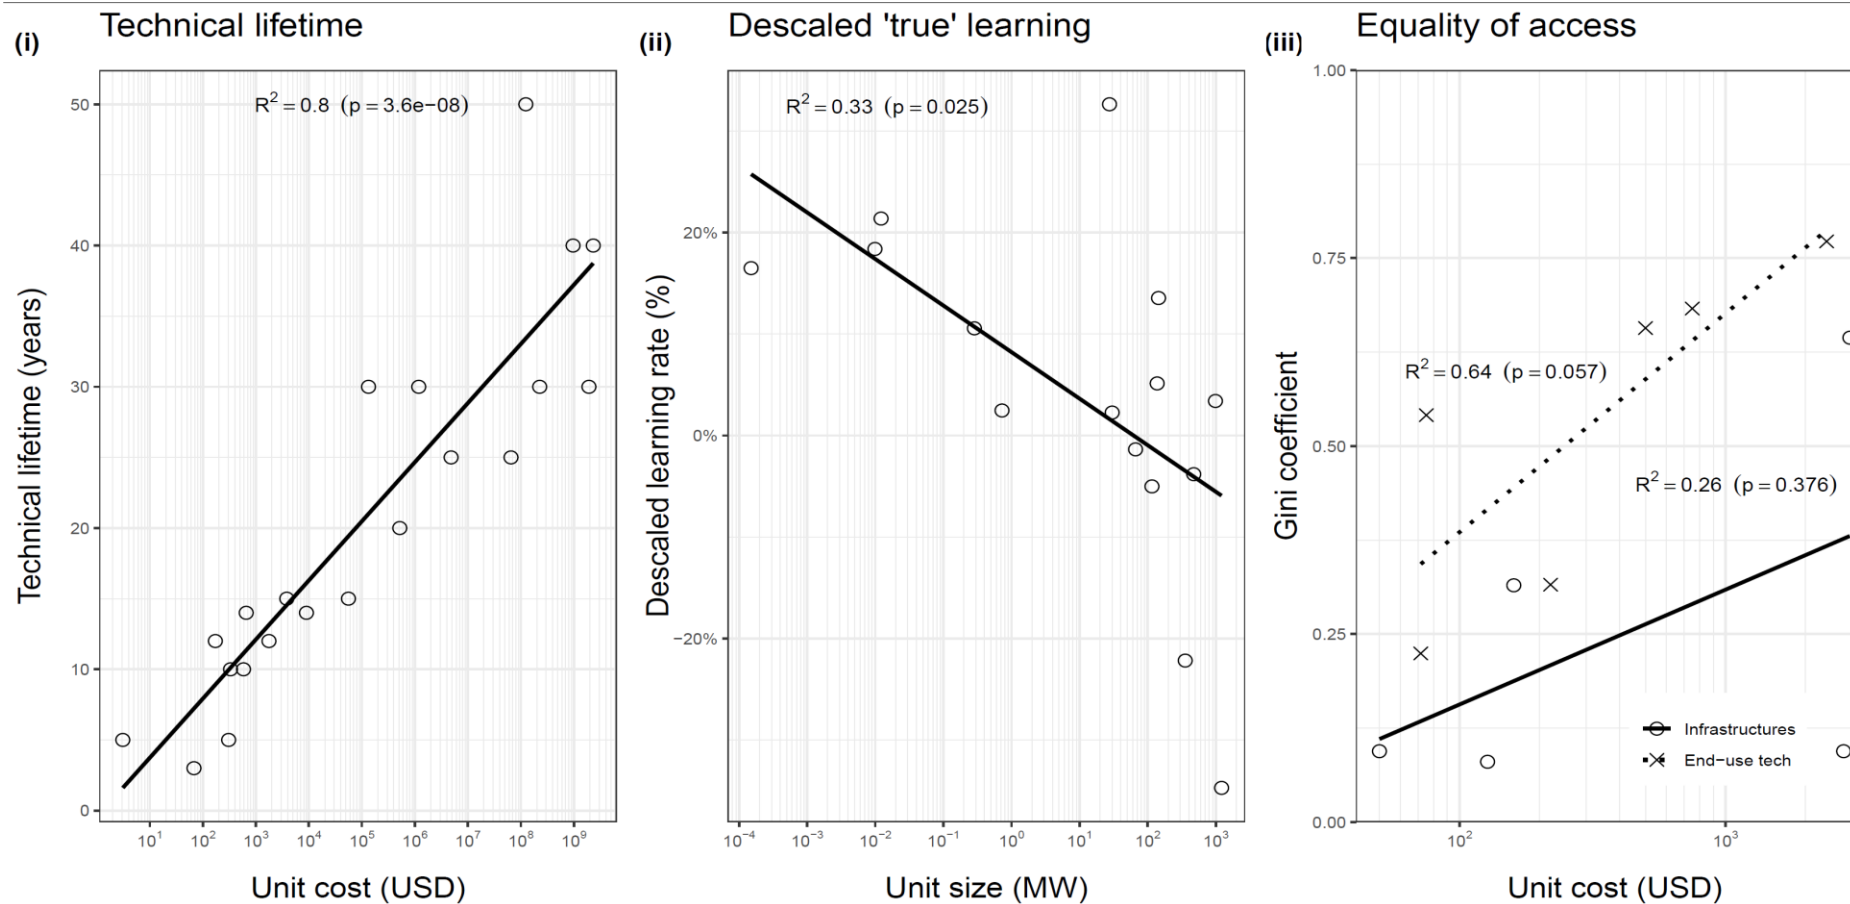

(iii) Efficiency potential

(iv) Complexity

# Transformational power of granular technologies II

# Summary

- 1) We have to account for synergies and trade-offs across systems.
- 2) The World in 2050 initiative is showing how this works for multiple sustainable development objectives.
- 3) Remember the paradox of innovation.
- 4) Think about human needs and demand side – people-centered and sustainability-oriented innovations.
- 5) Be aware of the power of granular innovations.

**Thank you.**
