## ,Sustainable building' in Hungary

Valeria Szabo, international project manager

"Partnership meeting" Debrecen, 06/07/2017

# LENERG Energia Ügynökség Mérnöki és Tanácsadó Nonprofit Kft

Cím: 4032 Debrecen, Egyetem tér 1. 🔀 E-mail: info@lenergia.hu 🥮

## Legal background

National level

**Decree of 7/2006. (V.24.) TNM** – certification of energy performance of buildings

176/2008. (VI.30.) edict, Law of 2015. LVII. - energy efficiency

## **Strategies I**

# **Hungarian National Building Energy Strategy (HNBES) - 2015**

Its objectives are in line with the National Energy Strategy 2030

- Contributing to the security to energy supply
- Increasing the competitiveness of the economy
- Ensuring the sustainability of national energy system

*Objectives of the HNBES by 2020 in primer energy savings of buildings:* 

	Objectives by 2020 in primer energy savings (PJ)
Retrofitting of private and public buildings	40
Retrofitting of buildings of enterprises	4
Other energy savings in buildings	5
Total	49

LENERG Energia Ügynökség Mérnöki és Tanácsadó Nonprofit Kft

## **Strategies II**

### **National Energy Efficiency Action Plan 2010 - 2020**

### **Scope of intervention**

- Requirements of buildings
- Private building stock
- Public building stock (mainly focusing on buildings of State and local governments)

#### **Tasks**

- Adequate regulation on goods and services
- Providing incentives to make energy savings
- Focusing on public buildings (setting an example, and saving money)

### Planned measures in private building and targets

- Retrofitting of private buildings 14.65 PJ/yr.
- Energy efficiency measures 5.67 PJ/yr.

## **Objectives – Energy production**

#### **Shares of Energy from Renewable Sources**

**RES-H** (heating and cooling) (GWh)

#### 2016 expected 2020 target

14 514 21 667

(approx.

2/3 of which is solid biomass, 1/5 non-heat pump geotherm)

#### RES-E (GWh)

2016 expected 2020 target

3453 5597 (from approx 60% biomass, 30% wind)

(approx. 45 000 GWh total electricity consumption)

The RES production targets altogether (if transport also added) make up 14.65% in gross final energy consumption (RES **Directive requires 13% only)** 

## **County level**

### **Spatial Development Program of Hajdú-Bihar county – 2014-2020**

Sustainable building:

- **Priority 1** Increasing energy efficiency in buildings, efficient energy use (e.g. heating agricultural buildings with geothermal energy)
- **Priority 2** Complex development of agricultural sector in HBC

# Number of projects implemented in Hajdú-Bihar county between 2007-2013 (New Széchenyi Plan)

Type of energy investments (Environmental and Energy OP)	Number of projects
Renewable energy use (mostly solar PV)	156
Combined investments (RES + EE)	72
Biomass power plant	8
Public lighting	5
Implementation of household size power plant	3
Rationalization of energy use	3
Procurement of healthcare instruments	2
Total	249

#### **Subsidies**

- Local governments Territorial and Settlement OP
- Enterprises Economy and Innovation Development OP
- Churches and State institutions Environmental and Energy Efficiency OP
- People ,Warmth of Home Programme'

# Thank you for your attention!
