Puglia Region: The path towards a RIS3 strategy

Seville, 3 May 2012
Adriana Agrimi
Anna Maria Zonno
Our Expectations from the Peer-Review Workshop - 1

Why we are here:

- Mutual learning
- Benchmarking
- Gearing up
- European and global positioning
Our Expectations from the Peer-Review Workshop - 2

The main questions:

✓ Process
✓ Methodology
✓ Priorities
✓ Time/flexibility/ learning by doing
✓ Developing a shared view of the future
Introduction: Puglia Region

Surface: 19.363 KM²
- Inhabitants: 4.090.402 = 7% Italy pop.

- GDP = 4,5% of Italian GDP
- Average GDP growth rate 2000-2007 = 0,7% (Italy = 1,1%)
- GDP/capita = 66,0% of Italy (2012 forecast)
- Regional exports = 2,2% of Italy exports (2011) = 8.159 mln €
- Regional exports variation rate 2010-2011= 17,9%

- Tradition of relations with Balkans and Mediterranean countries
- Regional competences in innovation policies
Economy Structure

Historical specializations

**Agriculture**
Export leader in olive oil, wheat, tomatoes….

**Manufacturing:**
“made in Italy” sectors
(furniture, textile, shoes…)
food processing
metals
Current developments

- automotive sector
- high value-added sectors: energy, ICT, aerospace
- Food processed products

Tourism 8% of regional GDP (2011)
only 3% in 2006

Employment in high tech industries and knowledge-intensive services is lower than the Italian average (2.4% vs. 4.1%).
## The Regional System of Innovation

### STRENGTHS
- Technological excellence poles
- Original R&I sectors
- Services providers
- Growth of informatics and research industry
- Growing demand for innovative services in the field of culture + environment
- Regional propulsive role in realizing policies for innovation development

### WEAKNESSES
- Weak link between universities and enterprises
- Low demand for real services
- Reduced R&D expense,

### THREATS
- Lack of financial instruments for medium term investments in R&D

### OPPORTUNITIES
- Investments made in information society related domains
The Regional Governance structure
Regional Innovation Policies

**DSR**
Regional Strategic Document

**Regional Strategy for Research and Innovation**
- Objectives
- Priority sectors
- Axes and Lines of intervention
- Funding sources: ERDF, ESF, National

**ERDF Planning**
- 8 Priority Axes
- 15 Specific Objectives
- 38 Operational Objectives
- 30 Lines of Intervention

**ESF Planning**
- 7 Priority Axes
- 15 Specific Objectives
The action plan was based on **three broad lines** of action:

- To qualify and specialize the regional innovation infrastructure;
- To support the Demand / Supply match of Innovation services;
- To support North - South and Euro-Mediterranean partnerships.
2\textsuperscript{nd} RIS Puglia (2000-2006)

- The First Regional R&D strategy (2001)
- Regional R&D strategy Realization Plan (2003)
- ROP Puglia 2000-2006, measures 3.12 e 3.13
- The Scientific Research Framework Programme Agreement, signed by Puglia Region, the MIUR and the Ministry of Economy (2005)
The regional agency ARTI

ARTI (Regional Agency for Technology and Innovation) is a public body created by the Puglia Regional Government in 2004 for:

– promoting the integration and strengthening of the regional system of innovation;
– supporting the regional government in programming, managing and evaluating the regional policies for knowledge transfer;
– facilitating the international networking of all the regional research and innovation actors;
– fostering the dialogue between industry and science and between science and the society.

Thematic priorities for R&I

The Regional R&I Strategy has identified in 2009 the following thematic priorities:

- Aerospace;
- Agro industry;
- Cultural heritage;
- Biotechnology and life science;
- Energy and Environment;
- Logistics and Production technology;
- Mechanics and Mechatronics;
- New materials and nanotechnology;
- Information and Communication technology.
Entrepreneurial dynamics

- **Productive Districts** promotion and monitoring

- **Technological Districts**

- Evolution from the **Regional Industrial Liaison Offices network (ILOs)**, including the 5 Universities in the region, ENEA and CNR to **Alliances for Innovation**
Characteristics of a productive district:

- A high concentration of enterprises especially of small and medium size, each integrated into a production system with relevant expertise and active support to local economy

- Presence of social and institutional stakeholders with capacities for supporting the local economy

Policy objectives:

1. increase the competitiveness and innovative capacity in order to expand their presence in foreign markets;

2. enhance the creation and development of new enterprises particularly in activities with high technological content;

3. intensify the processes of size growth.
Apulian Clusters dynamic

Tourism
Agro-food
Fishing and aquaculture
Flower gardening

Sustainable Building
New energy
Environment and recycling

Creative industry

Logistics
Nautical
Mechanics
Aerospace

Fashion
Wood and furniture
Stone quarrying
Communication & publishing

ICT & AAL
Technological districts

- Technological districts are territorial aggregations included to network and linked to the international environment, able to support local industrial growth based on innovation and research.

- Generally, the creation of a technological district tends to accelerate scientific and technological cooperation between leading companies and public actors in positions of excellence in a particular technology area.

The 4 Apulian TD’s

DHITECH - KITs
DARe - Technologies for Agrofood
MEDIS - Mechatronics
DiTNE – Renewable Energies
1. Promoting research and innovation is considered as a key policy instrument to enhance competitiveness and job creation, address major societal challenges and improve quality of life and is communicated as such to the public.

2. Design and implementation of research and innovation policies is steered at the highest political level and based on a multi-annual strategy. Policies and instruments are targeted at exploiting current or emerging national/regional strengths within an EU context ("smart specialisation")

3. Innovation policy is pursued in a broad sense going beyond technological research and its applications.

4. There is adequate and predictable public investment in research and innovation focused in particular on stimulating private investment.

5. Excellence is a key criterion for research and education policy

6. Education and training systems provide the right mix of skills

7. Partnerships between higher education institutes, research centres and business, at regional, national and international level, are actively promoted

8. Framework conditions promote business investment in R&D, entrepreneurship and innovation

9. Public support to research and innovation in businesses is simple, easy to access, and high quality

10. The public sector itself is a driver of innovation

Regional Profile

Introduction

Apulia is a region located in south-east Italy with a population of about 4m inhabitants. Apulia has a low rate of industrialisation and its contribution to national GDP is modest. Yet Apulia is still considered as the most dynamic region in Southern Italy and although investment in R&D is below the national average, Regional authorities have recently promoted several initiatives in support of innovation activity. The focus of innovation policy is on the creation of technological districts and investment in human capital.

Repository

Support measures

- Productive Districts
- Back to the Future - research grants
- R&D investment support for SMEs
- Networks of public research laboratories
- Support to newly established innovative SMEs
- Urban Laboratories

Policy documents

Economy

Apulia lags behind the national and European economy in terms of economic development. GDP per capita was on average €15,100 over the period 2000-2008, well behind the Italian and the European average...

- MORE

Research, Development & Innovation

Despite some recent progresses in terms of innovation capacity and increasing awareness about innovation issues in regional policy-making, Apulia remains one of the least innovative Italian regions. O...
Example of Strategic use of structural Funds: Networks of Public Research Laboratories (Puglia)

[...]The measure can be viewed as strategic for at least two reasons.

It aims at increasing the critical mass of regional research institutions and has an objective of maximising the impact on the regional productive system through the collaboration in the strategic areas [...] (cf. Regional Innovation Repository; Puglia; http://www.rim-europa.eu).
Revisiting the R&I policies

• Part of the policy reviewing action was carried out within the project of technical assistance entitled “Sostegno alle Politiche di Ricerca e Innovazione delle Regioni”, funded in 2010-2012 by the Department for Development and Economic Cohesion at the Ministry of Economic Development, the Central Administration responsible for Regional Policy in Italy, and by the Agency for the Promotion of Innovation Technologies in Public Administration, seated at the Presidency of the Council of Ministers.

• The SCINNOPOLI project (funded by Interreg VI C and joined by Puglia region through ARTI) has represented the occasion for building and transferring to the ROP Managing Authorities a more comprehensive and flexible policy evaluation tool box.
A new generation of policies

• A huge effort for coordinating the various regional policies towards the common goal of promoting employment through innovation and human capital development is on the way with the Extraordinary Employment Plan 2011.

• Several regional policies have addressed the potential of young people to create entrepreneurship through creativity.

• After the Europe 2020 strategy a new set of policies has been set up: regional innovation partnerships, innovation services, living labs, precommercial procurement.

• With the help of its agencies and technical bodies, the regional government is implementing a more effective monitoring system and is moving towards a policy impact assessment.
Our strategic vision for the future

Innovation and creativity for better life and jobs!
Toolbox for building the regional strategy

**Innovation oriented analysis** of the knowledge and value chains methodology

**Monitoring** of the activities and evaluation of the performance of the technological and industrial production districts

Set up of information to perform the *ex-post and impact evaluation*

Apulian ICT Living Labs and related **maps of social needs and catalog of partners**

**Innovation for employability**
Regional Innovation Partnership

• About **200 SMEs** in partnership with 13 research bodies all over the region.

• New business emerging activities

• **388 young researchers** (less than 35 years old)

• Reduced **time to market**

Regional Innovation Policies

Other Regional Policies

NVIP
Overall evaluation of regional policies
From the laboratory to the citizen. Innovation becomes participation.
Innovation for Employability

Lines of action implemented by ARTI:

✓ mapping of the needs of innovation and new skills expressed by the regional companies;
✓ design of regional policy instruments to strengthen the skills and the work inclusion;
✓ design and provision of support services for self-employment and young start-up;
✓ Regional technology foresight for better employment, more industrial innovation and new technology based firms;
✓ cross-cutting activities of communication, dissemination and implementation of the technological platform.
Governance

Setting up the RIS3 governance system:

• The manager of **Economic development, Labour and Innovation policies Department** assures the coordination with the other regional areas and with the regional council

• On behalf of the above mentioned Department, **Industrial Research and Innovation Service** manages the process

• The **implementing bodies** provide assistance and specific contributions

• The regional **stakeholders** are involved through their associated expressions

• A specific **steering committee** will be set up

• An **Open Scenario Building Process** will be launched and managed on web-based platform in order to debate and collect feedbacks (on June)
Next steps

• The **main partners** of the Apulian Region (ARTI, InnovaPuglia, PugliaSviluppo) will be asked to support the Industrial Research and Innovation Service in promoting a participated process for RIS3 development that will involve all the regional innovation system (technological and productive districts, etc).

• A **smart policies mix** should be continuously implemented on the base of the feedbacks provided by the monitoring and the evaluation exercises.
Looking beyond Your Region’s boundaries

**Puglia RIS3 in the international context:**

- Regional Internationalization plan (SPRINT)
- Strategic Development Plans of Technological and Regional Industrial Production Districts
- “Back to the future” initiative
- An active presence in territorial cooperation programs (Interreg IVC, MED, IPA-Adriatic, …)
- Specific benchmarking and best practices exchange projects (VIFP Iasmine, Interreg IVC Scinnopoli)
- Participation to the European Creative Industries Alliance

**European projects contribute to circulation of ideas and introduction of new practices at policy and territorial level**
Connecting Puglia to EU and global dimension

NEREUS network

Active and Healthy Ageing – independent living

European Creative Industry Alliance

AEROSPACE
Looking ahead

• **Stronger and wider links** with other EU regions shall be promoted

• A **better integration** between Horizon 2020 and the new cycle of Structural Funds is essential!
