MONITORING PROGRESS REPORT

Reporting Period: from June 2018 to December 2018

This Report is presented to the relevant Working/Steering Committee.
It contains two parts:

- I. Management Report prepared by the Lead Region(s)***

Based on the monitoring results, the European Commission will decide on the following year's support.

Executive summary (max. 250 words):

Formed in September 2017, the European Photonics Alliance is an active network of European Digital Innovation Hubs and clusters. Each member has deep domain knowledge of light-based technologies, often termed “photonics”. This is one of the 6 key-enabling technologies defined by the European Commission in Horizon2020. The regions listed here have identified Photonics as one of their Research and Innovation Strategies for Smart Specialisation.

Photonics Important to Other Industries

Photonics is starting to have a knock-on effect in different sectors of society including healthcare (needle-free testing for diseases), secure 5G communications, self-driving vehicles, food safety tests for pathogens as well as environment monitoring on earth and from space. It’s becoming clearer that light-based technologies are the key to building smaller, cheaper, faster devices to solve a lot of these grand societal challenges.

Because of the complex nature of these (nano)technologies, Europe needs an inter-regional collaborative approach if it wants to scale up Photonics companies. The partners want to maintain their lead in the development of Photonic Integrated Chips. Scaling up to volume manufacture of chips and products are important for a financially, socially and environmentally sustainable industry.

The goal of the Alliance is to amplify existing inter-regional initiatives and, when needed, kick-start new ones. Our focus is on building projects with inter-regional collaboration. Five members of the Alliance are also active partners in the EPRISE project which is organising successful outreach workshops on a local and national level.

II.D. Your Partnership and the UN 2030 Sustainable Development Goals (SDGs)

The EU has a strong position when it comes to sustainable development and is also fully committed to be a frontrunner in implementing the UN's 2030 Agenda¹, together with its member countries and regions. Many interregional partnerships under the thematic S3 Platforms contribute strongly to the attainment of these 17 goals.

Please indicate to which Sustainable Development Goals and to what extent your thematic Partnership contributes?
