IDEA 8. Animal feeds from wine by-products

*Using by-products of winemaking or distilling for animal feeds*

1. Brief description of the idea-partnership

The idea is about producing animal feeds using extracts from by-products of the various stages of the wine or tsipouro production process. The implementation of the idea consists of (a) establishing a local network of wine / tsipouro producers to collect the by-products; (b) setting up a low capacity plant to extract useful substances from by-products and (c) sell the substances to animal feed manufacturers. The idea is a derivative of another idea on using substances for food supplements (see above for details) and therefore uses the same approach in its development.

2. Initial interest of partners: 1 from industry, 1 researcher
