

Options for future cooperation

- ✓ A new H2020 project *ERA-MIN 3- Raw materials for the sustainable development and the circular economy*, coordinated by FCT (Portugal) will continue the launch of joint calls for transnational R&I projects in 2021 and 2023. Portuguese regions and any other EU region are invited to join the ERA-MIN Calls for proposals and support thematic areas aligned with their Strategy. The regions would use their regional budget or EU structural funds to support the research organisations and/or companies of their region in international consortia.
- ✓ Up to now, 16 projects with Portuguese participation were supported under ERA-MIN scheme, of which 10 have already ended. The project outputs/outcomes could be of interest to Portuguese regions to take those projects to higher TRL thus reaching impact in their regions.
