Executive Brief

The European Green Deal and the unprecedented European effort to foster socio-economic transformation and build a resilient and long-term sustainable EU bring to the fore the need for an upgraded role for innovation. The deep transformations of production and consumption systems are a momentous occasion to innovate to build stronger, as well as cleaner and fairer economies and societies.

However, the necessary transformations do not seem likely with innovation policy as usual. To stand a fair chance of having the required impact, new innovation policies must address two important prerequisites: First, the local and regional stakeholders including citizens, enterprises, knowledge institutions, local authorities must be meaningfully involved. Second, policy must strive for transformative, system-level, innovation in enabling and accelerating the necessary transformations.

The European Commission and the European Committee of the Regions launch the Partnerships for Regional Innovation fully recognising the role of all levels of government in realising the European Green Deal. These are renewed partnerships across all implicated stakeholders to align efforts and co-create transformation pathways, as a means to amplify impact by working across silos.

The Partnerships for Regional Innovation aspire to become a strategic framework for innovation-driven territorial transformation, linking EU priorities with national plans and place-based opportunities and challenges. This framework considers societal wellbeing and environmental gains as essential purposes for innovation. This means going beyond, but not excluding, innovating for economic prosperity and calls for considering societal and environmental impacts of transformation throughout the whole policy intervention: from its conceptualisation to the action on the ground. The aim is to extend and amplify the strategic potential of innovation to inspire, influence and cross-fertilise other sectoral policies, such as industrial, employment, education, environmental and social policies, which have so far largely operated in silos.

To this end, this Playbook proposes an approach to draw linkages across multiple policy domains and funding instruments, exploit synergies and address possible tensions to generate co-benefits for the economy, society and environment.

The initial approach is structured around three operational and interrelated building blocks: a Strategic Policy Framework, an Open Discovery Process, and a Policies and Actions Mix. These are based on the JRC’s experience with smart specialisation strategies over the past decade, state-of-the-art literature on innovation, including transformative innovation and sustainability transitions and the pioneering experiences of growing numbers of practitioners who are introducing more complete and transformative approaches as part of their innovation policies. For a synoptical view of the Three Building blocks, see Scheme 1.

The first building block is a Strategic Policy Framework, adopting a so-called Whole-of-Government approach that allows broader and dynamic planning. The framework is presented from a broad perspective as a set of multiple policy domains and levels of governance, strategies and funding sources, structured around the following elements:

- **Strategic Policy Framework**
  - Diagnosis
  - Directionality
  - Partnerships
  - Capacity building
  - Policy intelligence and digital infrastructure
  - Resource mobilisation
  - Governance of government
  - Stakeholder engagement and co-creation
  - Policy mix development
  - Build-in the European dimension

The partnerships are launched as a pilot project, in a spirit of co-creation by practitioners, stakeholders and experts. This Playbook is the initial support document for a pilot phase engaging Member States, regions and groups of regions who have volunteered to co-develop and test the approach, centred on a selection of practical policy tools. These tools aim primarily at enhancing the coordination and directionality of regional, national and EU innovation policies to implement Europe’s green and digital transitions and to tackle the innovation divide in the EU.

The partnerships will be designed from a multi-level perspective, paying attention to the needs of local, regional and national policy makers and opening pathways for their closer alignment and cooperation. In particular, they aim to address two types of fragmentation that affect the EU innovation ecosystem: the fragmentation of funding instruments and policies in territories, and misalignments between regional/ national and EU initiatives.

To this end, this Playbook proposes an approach to draw linkages across multiple policy domains and funding instruments, exploit synergies and address possible tensions to generate co-benefits for the economy, society and environment.
These elements, already present in EU policy-making, are now reconsidered through the lens of sustainability. This allows to translate the common EU and global challenges into local contexts, bring communities on board and adjust the scope of action so no place is left behind. For a schematic view of how the Partnerships for Regional Innovation fit into the EU Policy Framework see Scheme 2.

The second building block, an Open Discovery Process, enables engagement, deliberation and path co-creation with variable sets of stakeholders, repurposing the established participatory governance approach of smart specialisation towards sustainability, and also introducing new ways of working across silos, working backwards from desired economic, societal and environmental goals. Compared to the Entrepreneurial Discovery Process in smart specialisation, it more fully enables engagement with stakeholders, such as vulnerable groups affected by the transformation, users, grassroots and civic society organisations, among others. The specific composition of actors depends on the specific sustainability challenge.

This second block embeds a core addition of the new PRI approach, namely the introduction of local missions to coordinate actions under a coherent directional logic, enabling the exploration of broad-ranging policy mixes for system-level innovation. These local missions could take the form of a proposed configuration outlined in the Playbook: CHallenge-Oriented Innovation parTner-ships (CHOIRs). CHOIRs are multi-stakeholder and, as far as the government is concerned, multi-department partnerships linked to specific territorial challenges with the aim of achieving impacts within established time frames.

The third building block, a Policies and Action Mix, mobilises additional instruments to publicly-funded projects, sequences interventions against other actions so that they result in synergies by design and, importantly, co-opts additional actions by stakeholders.

In the context of PRI, this last building block has three key features: (i) policy mix development as a response to opportunities and challenges identified during the Open Discovery Process (ii) readiness to identify and deploy the right tool for the job, considering where possible both supply- and demand-side instruments (iii) the alignment and coordination of policy packages striving to also influence policies across policy silos and levels of governance.

In the Playbook each building block is linked to a wide range of tools for conceptualising, diagnosing, designing and initiating PRI as part of a long-term process of exploration, experimentation and competence development. Each of the building blocks will have to be adjusted considerably to the realities of each territory and its goals. This Playbook therefore is not a process guide: it rather provides practitioners with a conceptual frame and pathways for them to experiment and create their own PRI.

The Playbook also contains a toolbox and includes a guide on how it can be used. This toolbox aims to demonstrate, drawing from inspiring policy experiences across Europe and the world, that the policy directions and tools for the green and digital transition are worth developing and that there are possibilities to introduce PRI that are open to all levels of government in the EU.

By providing an accessible point of entry to a broad range of approaches and tools, the Playbook aims to promote knowledge of good practices, facilitate learning through experimentation and support the long-term development of the right capacities both within public administrations and in the broader ecosystem.

Particular attention is placed on tools and governance mechanisms that mobilise multiple sources of funding and policies, and that can help connect regional and national initiatives to EU initiatives for the twin green and digital transition. Over the course of the Pilot, the tools will be further improved, adapted and tested against the realities of European regions and Member States, turning the Playbook into a mature operational guidance document. For a schematic view of the Member States and Regions participating in the Pilot, see Scheme 3.
The Partnerships for Regional Innovation are structured around three operational and interrelated building blocks:

1. Open Discovery Process (ODP)
2. Strategic Policy Framework
3. Policy and Action Mix

The three building blocks are based on the JRC’s experience with smart specialisation strategies over the past decade, state-of-the-art literature on innovation, including transformative innovation and sustainability transitions and the pioneering experiences of growing numbers of practitioners who are introducing more complete and transformative approaches as part of their innovation policies.

**Key features of an ODP**
- Directionalities focused on long-term societal wellbeing
- Control vs influence
- Openness: goals, agendas, boundaries
- Working backwards from goals
- Challenge-orientated partnerships (CHORs)

The discovery process and the actions are closely connected. The Open Discovery Process and the Policy and Action Mix are where policy design and implementation actually happen.

**Policy and Action Mix key features**
- Readiness to identify and deploy both supply- and demand-side instruments
- Policy mix tailored to opportunities and challenges
- Alignment and coordination across policy silos

**SCHEME - 1 PRI building blocks**

**The Partnerships for Regional Innovation (PRI)**

**EU Policy Framework**
- Cohesion policy
- Recovery and Resilience Facility
- Industrial policy
- EU missions under Horizon Europe

**Partnerships for Regional Innovation (PRI)**
- EU
- National
- Regional
- Local

**GREEN DEAL and Digital Transition**

**Strategic policy framework elements**
- Through the lens of sustainability
- Build-in the European dimension
- Diagnosis
- Partnership
- Capacity building
- Policy intelligence and digital infrastructure
- Stakeholder engagement and co-creation
- Governance of government
- Resource mobilisation

**PRI BUILDING BLOCKS**

1. Open Discovery Process
   - ODP allows for engagement and path co-creation with variable sets of stakeholders working backwards from desired societal outcomes
   - The discovery process and the actions are closely connected

2. Strategic Policy Framework
   - Lays the foundation for action in the ODP and Policy and Action Mix and allows broader and dynamic planning

3. Policy and Action Mix
   - Includes the possibility to mobilise additional instruments to publicly-funded projects, as necessary for the desired outcomes, including private sector co-investments
   - Territorial strategy that aligns or influences multiple policies and funds
We need innovation in every region and in every country, connecting with each other, including between advanced and less advanced regions, if we are to succeed in the green and digital transitions.

The PRI will attempt to bring networks of regions together to co-create mechanisms that address fragmentation and link territories to sustainable European value chains. This can lead to the construction of viable transition pathways in place-based industrial transitions.

The PRI are fully aligned with the socio-economic transformation logic underpinning the Green Deal. PRI can effectively support Green Deal objectives in every territory.

The PRI can in fact strengthen S3 implementation, without interfering in any way with the conditionality criteria.

**EU POLICY FRAMEWORK**

- Cohesion policy
- Recovery and Resilience Facility
- Industrial policy
- EU missions under Horizon Europe

**EU GREEN DEAL**

- Fight Climate Change and improve the well-being and health of citizens
  - Fresh air, clean water, healthy soil and biodiversity
  - Renovated, energy-efficient buildings
  - Healthy and affordable food
  - More public transport
  - Cleaner energy and cutting-edge clean technological innovation
  - Longer lasting products that can be repaired, recycled and re-used
  - Future-proof jobs and skills training for the transition
  - Globally competitive and resilient industry

**EU INDUSTRIAL POLICY**

- Transition to sustainable industry
  - 14 different ecosystems that include all production players
  - Co-creation of paths for industrial transition with industry, public authority, social partners

**EU COHESION POLICY**

- Economic, social and territorial cohesion
  - Support Green and Digital transition
  - Funds to support actions that improve S3 strategies already in place
  - Supports and funds Research, Innovation and uptake of advanced technology

**EU FUNDING FOR R&I**

- EU funds for R&I
  - Already oriented to Green & Digital transformation
  - Prepared to create & exploit synergies between different level of governance

**HORIZON EUROPE**

- The path to recovery
  - Funds & instruments for socio-economic transformation
  - A total of €723.8 billion (in current prices) in loans (£385.8 billion) and grants (£338 billion) – Recovery and Resilience Plans
  - Green transition
  - Digital transformation
  - Economic and social cohesion, resilience

**RECOVERY AND RESILIENCE FACILITY**

- The PRI can support implementation of the Recovery and Resilience Facility at territorial level, inspiring a logic of economic transformation that links RRF funding with other available instruments and delivers real change.

**PRI**

- Align multiple funds/policy domains for the twin transition
- Be suitable for various levels of governance (not just regions)
- Deploy various support instruments (not just projects)
- Allow linking with European missions and partnerships (e.g. through mission hubs)

The PRI approach should help align multiple funds/policy domains for the twin transition, be suitable for various levels of governance (not just regions), deploy various support instruments (not just projects), and allow linking with European missions and partnerships (e.g. through mission hubs). This will be crucial to ensure a cohesive and effective approach to the green and digital transitions.
Participation in the Partnerships for Regional Innovation (PRI)

The Partnerships are launched in a spirit of co-creation with practitioners and experts. The Playbook is the initial support document for a pilot phase engaging 74 territorial entities who have volunteered to co-develop the approach.

Over the next year, the participants will exchange good practices and test these policy tools against their realities and challenges, co-creating concrete operational guidance.

<table>
<thead>
<tr>
<th>4 Member States</th>
<th>74 territories</th>
</tr>
</thead>
<tbody>
<tr>
<td>63 regions</td>
<td>7 cities</td>
</tr>
</tbody>
</table>

- 28 single regions and 1 city applying individually
- 6 networks of cities and regions across the EU, encompassing 35 additional regions and 6 additional cities
GETTING IN TOUCH WITH THE EU

In person
All over the European Union there are hundreds of Europe Direct information centres. You can find the address of the centre nearest you at: https://europa.eu/european-union/contact_en

On the phone or by email
Europe Direct is a service that answers your questions about the European Union. You can contact this service:
- by freephone: 00 800 6 7 8 9 10 11 (certain operators may charge for these calls),
- at the following standard number: +32 22999696, or
- by electronic mail via: https://europa.eu/european-union/contact_en

FINDING INFORMATION ABOUT THE EU

Online
Information about the European Union in all the official languages of the EU is available on the Europa website at: https://europa.eu/european-union/index_en

EU publications
You can download or order free and priced EU publications from EU Bookshop at: https://publications.europa.eu/en/publications. Multiple copies of free publications may be obtained by contacting Europe Direct or your local information centre (see https://europa.eu/european-union/contact_en).
The European Commission’s science and knowledge service

Joint Research Centre

JRC Mission
As the science and knowledge service of the European Commission, the Joint Research Centre’s mission is to support EU policies with independent evidence throughout the whole policy cycle.
